The marriage of Miss June Lamb to Mr. Lee Card, both of Cardston, was solemnized at the bride's home last Friday night, with Bishop W. E. Pitchor officiating The young couple were known locally, especially Miss Lamb ,and they have the best wishes of this community.

T. Geo. Wood, manager of the Canadian Sugar Factories, Ltd., Raymond, and Frank Taylor, one of the company's field men, were Cardston visitors on Friday last week, on route to the U. I. D. beet fields. They report the beet crop there at least 50% better than last year, and that with more experience in handling this crop the farmar's there will find the beet crop their most important business and one that will bring the biggest returns.—Cardston News.

Jimmy Anderson left this morning for Edmonton, where he will spend thanksgiving with his folks.

Judge Wilson McCarthy, son of Mrs. Charles McCarthy is a candidate for Senator for the state of Utah.

FOR SALE—Kitchen Range, 2 Hot Blast Heaters, 2 Bedsteads, 1 Cot, Winnigeg Couch, 2 Rockers, 5 Chairs, Wardrobe Dresser, Washstand, Buffiet and Cupboard. —Apply Bert Grand, Raymond.

BABY CHICKS—Pure-Bred-to-Lay—that Liv-An-Gro from Tested, Trapnested and Inspected Flocks. White Leghorns, Barred Rocks, Red Wyandottes, White Rocks, Anconas, Minorcas, Orpingtons. Early Order Discount for orders received now. Write for Free Catalogue, Alex. Taylor's Hatchery, 362 Furby St., Winnipeg, Man.

Miss Lucy Roberts, who has been working for J. A. Johausen during harvest, returned to her home in Raymond last week.—Cardston News.

Monday is Armistice Day

Sunday November 11th, another mile stone in history. Memories of war stricken countries, of heart broken mothers, fathers, wives, sweethearts and loved ones, of the joy brought by the news, The war is over. Long trips to home and loved ones. Prisoners of war freed and permitted to join the ranks of their own colors. Memories of the cruel ravages of war. The wounded broken bodied heroes, wrecked for life for a cause they believed to be right. Those boys who gave their all, left in peace on a battle scarred foreign land.

Let us bow our head in memories and gratitude.

Remember boys that accursed bugle in the wee hours of the morning, that physical exercise, that mush and corn bread, that incessant drilling with some hard boiled sargeant screeching and yelling orders. That bayonet drill with hundreds of men bayonets fixed yelling like Indians, running like mad, charging an imaginary foe.

Evening comes, the stillness of the place is broken by the shrill bugle call to retreat. Hundreds of men standing in perfect lines, the order, Present Arms as the colors are drawn. Thrilling to the very bone. Every man there to do or die that those at home might live in peace and happiness.

Official announcement has been made of the affiliation of The Standard Bank of Canada with The Canadian Bank of Commerce. Manager Halpin will remain here in charge of this branch.

Grover Corless was a visitor in Raymond last week end. Mr. Corless, formerly of the Recorder staff, is working as a printer at Stettler, Alta.

Mrs. Neil Fisher left this morning for her home in Missoulla, Mont. She been in Raymond the past month attending to property here.

The members of the high and public school staffs entertained the the school board at a banquet last Friday evening.

Mrs. R. Webster entertained in honor of Mrs. Chas. Eveson last Saturday. Mrs. Evason left on Sunday for La Grande, Ore., for an extended visit with her daughter, Ethel.

A meetiug of the School Board was held at the town hall Wednesday evening. Mr. T. G. Wood, Mr. Wm. Redd, Mrs. M. Boyson and Mrs. O. H. Snow were present to present a petition asking the school board to increase Mr. Mitchell's salary sufficient to hold him on the school staff. They pointed out the real value of Mr. Mitchell's musical ability in the schools. The board did not grant this petition.

The school board feel they have been behind Mr. Mitchell morally and financialy pointing out the fact that back government grant for 1923-1924, amounting to $351.90 was recieved and handed to him in a lump sum in 1924, and since then about $88.00 per year out of the grant, thus bringing his total to $1,600.00.

It is poiuted out that to give him an inorease would mean a corresponding increase in other teachers wages.

News Notes

Mr. Douglas Paris, of the Standard Bank staff motored to Champion last Sunday, to which branch of the Canadian Bank of Commerce he has been transferred, in keeping with banking company's policy of exchanging employees of the two banks since their merger. Mr. Paris will be greatly missed locally, and especially will his absence be noticed by the local hockey enthusiasts, as Mr. Paris was an outstanding star of our local team. Mr. Gaetz of Champion is taking Mr. Paris' place here.

Conference last Monday and Tuesday was well attended, locally and from all points out of town. The principal speakers were Apostle Orson F. Whitney and Mrs. Knight Allen.

First Ward Sunday School is having a big Armistice Day program next Sunday. Superintendent Frank Taylor extends a personal invitation to all, and assures a real program. Don't miss it.

Good progress is being made at the sugar factory, and we notice a smile on the faces of all the staff now. Every one is very much encouraged and prospects for an increased acreage next year is already in sight.

Harvest is over and every one is in a position to take a renewed interest in town affairs. The Board of Trade have called a meeting and luncheon at the Club Cafe next Wednesday at 1:15 o'clock. The chief topics to be discussed are; Roads — Roads — Roads. How, when and where. Don't miss this meeting if you are the least bit interested in your own affairs. If you are not a member now is the time to join. You are surely invited and will be welcomed by all.

A farewell party and dance was held in the 2nd Ward Chapel. in honor of Cleon Rollson, who is leaving on a mission to the Central States. Many attended the social and reported a very good time. Cleon left for Salt Lake Thursday.

The death of Miss Alice Wilbur, sitster-in-law to C. Smith, factory foreman, occurred suddenly last Monday night from an attack of heart trouble. Miss Wilbur and her mother were here on a visit. The remains were taken to Rigby, Idaho for interment. Mrs. Wilbur and Mrs. Smith left on Wednesday to attend the funeral.

John Johansen and family payed Raymond a short visit Wednesday His son is leaving for Denver to fill a mission.

While playing ball at the High School, Marie Redd sprained her ankle, injuring several blood vessals. Dr. Leech attended.

Mr. and Mrs George Laycock are spending the week at Calgary.

Mr. and Mrs Lee Brewerton with Mr. and Mrs. Deal Mendenhall motored to Calgary last week. The probable instalation of a linotype in the Recorder office might be the result. While there the motion picture "talkes" showing at the Capitol was enjoyed by all.

The citizens of the United States are breathing easy once more after one of the sensational election campaigns of its history. Herbert Hoover won by a large majority.

In clean, bright Aluminum

A Contribution To Canada

Out of the welter of charge and denial and appeals to racial and religious prejudice which characterized the recent Arm River by-election in Saskatchewan one newspaper despatch from a special correspondent vividly impressed the writer of this column.

In the course of his journeyings around the constituency reporting the many meetings held, the staff correspondent of the paper in question had occasion to stop at the hotel in one of the smaller villages. The hotel was not of the usual type found in prairie villages. The rotunda he describes as "a bower of floral beauty," a close approach to a greenhouse. The ceiling was beautifully beamed and panelled, the proprietor having laid out five different plans for it before he felt satisfied. The hotel was scrupulously clean, the meals well cooked and nicely served by attractive help.

The correspondent was curious and he entered into conversation with the proprietor, one Kasper Haberlach by name. The secret of the beautiful woodwork was soon discovered in the fact that, in his youth, the proprietor had been a cabinetmaker, and had a love for fine woods and the beauty of fine lines. His love for the beautiful also found expression in his flowers. Relating his story, Kasper Haberlach told how he came to Canada sixteen years ago, in his early manhood. Today he is the father fo seven daughters and two sons, most of whom were born in Canada.

Proud as Kasper Haberlach is of his attractive hotel, it is his family in which he rejoices. Particularly is he proud of their school attainments. One of the Misses Haberlach led her school for threo years in succession. The youngest girl, now aged seven, was sought by Chatauqua promoters a couple of years ago because of her talents as an entertainer. Kasper Haberlach, himself, speaks six languages fluently, but, says the correspondent, "I think he is probably most proud of the fact that his children all speak English indistinguishable from any other Canadian children."

Mr. Haberlach has a praiseworthy method of inculcating thrift in his family. His daughters help in the hotel. "I have always made it a rule," he said, "to pay my children wages daily for their help in the business, just as I would strangers. They are encouraged to save for education or business or whatever they desire."

Now what we find so encouraging in this whole story is that it seems to provide an answer to many good people who are greatly concerned over the subject of immigration. Here is a man from a foreign country, whose mother tnogue is not English, but who, coming to Canada, brings with him an inborn seose of beauty, skilled craftsmanship, habits of thrift, high ideals of home life and citizenship, and a keen realization of the value of education, a man anxious that his children shall have the best that life can offer and determined that, to the full extent of his ability, they shall enjoy those privileges.

In this story from real life today, we also find a satisfactory answer for those who are inclined to question the efficiency of our schools and educational system, and their ability to perform the task of largely assimiliating new comers from other lands into our common Canadian family.

The fact cannot but he realized and accepted that Kasper Haberlach brought with him to Canada something of far greater value to this country than money, and that the contribution he is making to the upbuilding of this Dominion is something more than, and far beyond, the mere making of money through the management of a well regulated hostelry for the comfort and convenience of the travelling public.

In the evolution and development of the Canadian people we require all the beauty, all the craftsmanship, all the talent, all the thrift, and the full recognition of the real things of life, that all the peoples of all the world can contribute. Canada does not desire to be a mere copy of any other nation or people, even though that nation and people be the best in the world today. Our ambition is loftier than that; as a Dominion our ambition is to rise still higher, and to develop on this northern half of the American continent a type of citizen superior to all that have preceded us,—a citizenship that shall be God-fearing, healthy, industrious and happy, revelling in all that is beautiful in art, music, literature and nature, and finding a real joy and contentment in seeing our work well done.

And to all who have a contribution to make in working out this pattern of a strong and ideal Canadian citizenship, this Dominion should extend a wholehearted welcome.

Canada's Progress Steady

Growth Not Just a Boom Says Hon. James Malcolm

Canada is progressing steadily. By almost every standard that can be applied, her economic condition is becoming increasingly satisfactory as time goes on and the people are now at a very high level of national well being.

So says Hon. James Malcolm, minister of trade and commerce in the federal cabinet, in a report given in England of the conditions now reigning in the Dominion.

There is a sound basis of prosperity in this country, he says. There have been no great booms unfounded on natural development or unjustified in the light of indications. There is an increasing possession of comforts and conveniences of life among the people of Canada—there is a sound credit in their banks. There is prosperity in the air and happiness in the homes of the Dominion.

The amount of construction of new buildings throughout the Dominion in the last year has been phenomenal, his report shows. Yet there has been no outstripping the needs of this rapidly developing commonwealth. The country is not as in the days of the boom period which was climaxed in 1912, building any great railway lines in advance of population. Rather, construction in all lines is proceeding in response to our needs. It is a healthy progress.

Paul "The doctor has prescribed rest and change for me."

Paula—"Well, why are you so gloomy about it?"

Paul—"He advised me where to get the rest, but he didn't tell me where to get the change."

Corns cripple the feet and make walking a torture, yet sure relief in the shape of Holloway's Corn Remover is within reach of all.

Unobservant Customer: I suppose you guarantee there's no chickens in these eggs?

Dealer: I certainly do, sir—they were laid by a duck.

A Preventative

For preventing stiffness and further pain from sprains and hurts of any kind use Minard's.

New Serum For Burns

Recent Discovery Leaves Skin Unblemished Surgeons Are Told

A new method of treating burns, causing quick healing with absence of scars, discolored skin or other blemishes, was described before the convention of the National Association of Police and Fire Surgeons and medical directors of Civil Service Commission.

The method, as detailed by Dr. Stephen R. Monteith, of Nyack, N.Y., and discussed by Dr. John J. White, of New York, involves the use of "normal horse serum" made from the blood of horses under a lately discovered method. The serum is sprayed with an atomizer on the burned skin surfaces and it is said has produced astonishing results.

TO THE MOTHERS OF ALL PALE GIRLS

If Your Daughter Shows Signs Of Anaemia a Tonc Is Needed

Anaemia is simply a lack of blood. It is one of the most common and at the same time most dangerous troubles from which growing girls suffer. It is common because the blood so often becomes impoverished during development, when girls often overwork and overstudy. It is dangerous because of the stealthiness of its approach and because of its tendency to grow steadily worse. Every growing girl should occasionally take a tonic to ward off this insidious trouble. It is because of their powerful action in rebuilding the blood that Dr. Williams' Pink Pills have made a world-wide reputation. The case of Miss Claire Sullivan, Pincher Creek, Alta., amply proves the value of this medicine. Miss Sullivan says: "During my school days I suffered a great deal from thin and watery blood. I was continually weak and tired; my appetite was poor, my sleep unrefreshing and I was troubled with backaches. To make matters worse I was attacked with acute appendicitis and the operation left me in a very weakened state. My mother, learning of the value of Dr. Williams' Pink Pills, had me take them and after using them for some time I can say the result was simply wonderful, as they completely restored my health, and now when opportunity occurs I always recommend these pills to weak, pale girls suffering as I did."

You can get the pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Giant Guns For Naval Base

Constructed As Experiment During War But Never Used

Three giant guns constructed experimentally during the War have arrived at Singapore from England, to form part of the naval base's defence. They are 18-inch weapons, nearly sixty feet long, which weigh 150 tons each and fire a 3,333 lb. projectile. These three guns were the only ones of their kind constructed. They were mounted on naval units for use in bombarding German positions, but the war ended before they could be effectively employed.

Many children die from the assaults of worms, and the first care of mothers should be to see that their infants are free from these pests. A vermifuge that can be depended on is Miller's Worm Powders. They will not only expel worms from the system, but act as a health-giving medicine and a remedy for many of the ailments that beset infants, enfeebling them and endangering their lives.

Ship Live Mink To France

E. Swain, of Larsen, a small station on the Sioux Lookout branch of the Canadian National Railway, was in Port Arthur recently delivering to the express office a shipment of ninety live mink for transportation to France, where they will be used to stock a fur farm. Mr. Swain sold the mink f.o.b. Port Arthur, and on delivery drew in payment $7,500 for the 90 animals.

COULD NOT WORK FOR MONTHS

Restored to Health by Lydia E. Pinkham's Vegetable Compound

Port Elgin, N. B.—"For three months, I was nervous and weak with tired feelings and could not do my work. A friend advised me to take Lydia E. Pinkham's Vegetable Compound and I have got good results from it and recommend it to others."—LILA TAYLOR, Port Elgin, N. B.

This dependable medicine is sold by druggists everywhere.

VITAMINS

Everyone needs them to support growth or to protect the body against germ-infection.

Scott's Emulsion

abundantly rich in vitamins is of great importance in all run-down conditions of the body. Scott's Emulsion builds strength.

Scott & Bowne, Toronto, Ont. 25-61

Result Of Experiment Will Be Interesting

Psychologists Study Effect Of Noise On Human System

"City" rats and "country" rats are being raised at Colgate University, Hamilton, N.Y., and the "city" rats are developing nervousness.

The effect of noise on health and activity is what Dr. Donald Laird, head of the psychology department of the university, wants to discover. All the rats are free from molestation by cats and the consequent nervous strain.

By exposing the rats to varying conditions of sound, or lack of sound, Dr. Laird hopes to determine definitely the effect of noise on human beings.

Rats are used in the experiments because, Dr. Laird explains they live 30 times as fast as men and in one year their growth parallels the growth and development of a human being in 30 years. The rats in this experiment are white.

The "country cousins" are kept in a sound-proof room while the "city" rats are housed in a room containing a tuning fork operated by electricity. The tuning fork is said to produce sounds approximately the noise of a busy city.

Food containers and food are the same for both groups so that differences in feeding may not account for any differences which develop in the nature of the two groups. The health of the rats is carefully guarded. Both groups are given an ultra-violet ray bath once a week to prevent rickets.

The rats have been under observation for eight months and Dr. Laird reports that the "city" rats, exposed to noise, have shown signs of nervousness and loss of eppetite.

An Oil For All Men.—The sailor, the fishermen, the lumbermen, the outdoor laborer, and all who are exposed to injury and the elements will find in Dr. Thomas' Eclectric Oil a true and faithful friend. To ease pain, relieve colds, dress wounds, subdue lumbago and overcome rheumatism, it is excellent. Therefore, it should have a place in all home medicines and be amongst those taken on a journey.

Manitoba Hydro Extensions

Comprehensive Plan For Extending Electrical Power To Cover Rural Districts

An extensive hydro development programme which would bring electrical power to practically every town in Manitoba and to farms where by use of electricity in its many ways the drudgerg of rural life could be eliminated, was outlined by Hon. Donald G. McKenzie, newly appointed minister of mines and natural resources, in an address at Virden, Man.

Mr. McKenzie, who will be in charge of the provincial government's hydro development plans, outlined the programme at a meeting of the United Farmers of Manitoba, Brandon District.

Mr. McKenzie announced that the government has decided to present legislation providing for the payment of one-half the capital cost of all transmission lines, including a line to Brandon; new lines to all towns in Manitoba; all farm lines, and lines already constructed.

The legislation will also provide facilities which will permit of the construction of transmission lines to all parts of Manitoba within seven years. Under the plans, very low rates are assured, said Mr. McKenzie, for the rural users of power.

Taking No Chances

The small office boy ran into the manager's office wild with excitement. "Oh, sir," he cried, "a man's fallen through the coat hole."

"All right," replied the boss, "just put the lid on him while I get a policeman. We'll charge him with stealing our coal in case he sues us for damages."

Irish Priest (addressing damaged invalid): "I'm going to pray that you may forgive Casey for having thrown that brick at you."

O'Leary: "Mebbe yer Riv'rence 'ud be saving tolme if ye'd just wait till Oi get well, and thin pray for Casey."

Minard's Liniment Heals Cuts and Bruises.

Manitoba Sanatorium

Sale Of Christmas Seals To Be Held This Year To Help Along the Good Work

The Manitoba Sanatorium at Ninette, Man., is launching again this year its sale of Christmas Seals. The Christmas seal fund last year made possible the purchase of a portable X-ray outfit, and, up to September 1st, financed the general expenses of twelve "missionary journeys" for the examination of people who had been in contact with tuberculosis, or who were suspected, or had symptoms. Three thousand people were examined, all known to be "contacts" or "suspects," a work very much worth while.

The 1928 seal money will be used to continue and extend this work and may also help with a very special work — to provide sanatorium care for children. The Province of Manitoba has not one bed especially provided for a tuberculosis child. There are children definitely ill, and children under par and infected who will soon be ill. To care for these sick children, to build up the almost-sick children into health and prevent their lapse into disease, is one of the best of all good works. Seals may help to do this. Prevention is better than cure, cheaper and more joyful in every way.

Christmas Seals are sold in sheets of 100 for $1.00; a seal for a cent. You can assist greatly in a most worthy cause by purchasing a sheet of these seals, and use them on all letters sent out during the Yule-tide season. Those willing to help may obtain these seals by writing to the Manitoba Sanatorium, at Ninette, Man. Dr. David A. Stewart is the medical superintendent.

An Oil That Is Prized Everywhere.—Dr. Thomas' Eclectric Oil was put upon the market without any flourish over fifty years ago. It was put up to meet the wants of a small section, but as soon as its merits became known it had a whole continent for a field, and it is now known and prized throughout this continent. There is nothing equal to it.

Suggest Shorter Names

Paris Society Has Idea It Would Mean Great Saving

The Society for the Saving of Time, a newly founded French efficiency organization, is for the shortening of names.

The group would like to see Parliament pass a law limiting family names to five letters and Christian names to two. They figure that in the business world alone millions of dollars could be saved annually in salaries of typists and wear on machines if names were held down.

They suggest that Jo., Ed., Al., Lu. and Jk., are just as high sounding as Joseph, Edward, Albert, Lucien and Jack.

Minard's Liniment for Backache.

Science has added years to the average life, but it has also produced the motor car that will travel 60 miles an hour.

Beautifying Station Grounds

Great Interest Taken In Gardens Along Lines Of Canadian Pacific Railway

Interest in station gardens along the Canadian Pacific Railway this year has been greatly stimulated by an increased prize list, and the results have been exceptionally gratifying. G. A. B. Krook, chief horticulturalist, with the assistance of the superintendents, has just finished judging; the general excellence of the gardens making this a difficult task. In each of the four districts one general prize for the best kept garden has been awarded, two in each division for the old visible gardens, one for new visible garden, one for old and new invisible garden, and special mention made of those considered worthy. Fourteen prizes were awarded in the Manitoba District, with 15 specially mentioned; 12 prizes awarded in Saskatchewan District, 10 specially mentioned; 13 prizes in Alberta with one specially mentioned; and in British Columbia, 16 prizes with no special mention.

The prizes for best garden went to W. A. Hooper, section foreman, Minnedosa, for the Manitoba District; to Chas. W. Chapin, locomotive watchman, Strasbourg, for the Saskatchewan District; to D. Skarum, section foreman, Carstairs, in Alberta District; and to T. W. Bundy, agent at Erickson, in the British Columbia District.

Conquers Asthma. To be relieved from the terrible suffocating due to asthma is a great thing, but to be safe-guarded for the future is even greater. Not only does Dr. J. D. Kellogg's Asthma Remedy bring prompt relief, but it introduces a new era of life for the afflicted. Systematic inhaling of smoke or fumes from the remedy prevents re-attacks and often effects a permanent cure.

Crossed English Channel In Balloon

Blanchard, with Dr. T. E. James as passenger, was the first to cross the English Channel by balloon, and Colonel Fred Burnaby, a century later (1882), the second.

"So your wife has left you?"

"Yes, about four days ago."

"What did she say when she went?"

"'Is my hat on straight?'"

ASPIRIN

You doubtless depend on Aspirin to make short work of headaches, but remember that it's just as dependable an antidote for many other pains! Neuralgia? Many have found real relief in an Aspirin tablet. Or for toothache; an effective way to relieve it, and the one thing doctors are willing you should give a child— of any age. Whether to break up a cold, or relieve the serious pain from neuritis or deep-seated rheumatism, *there's nothing quite like Aspirin.* Just make certain it's genuine; it must have Bayer on the box and on every tablet. All druggists, with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

Western Canada Airways Achieves Remarkable Record Transporting Freight In North

Announcement has been made that the Western Canada Airways Ltd., which have made The Pas the head office and principal base of operations during this summer, has under consideration the moving of headquarters from The Pas to Cranberry-Portage. This change has not been definitely made.

This company has achieved a remarkable record in aerial transportation during its first season. Hundreds of passengers and a large amount of freight has been transported over the north country without a mishap of any description and without the loss of a single pound of freight.

A notable example of the aerial work of the company was the journey of the superintendent, Major G. A. Thompson, from The Pas recently to Fort Churchill for passengers and return within the same day. Early in June after the steel had been laid on the Flin Flon railway to Cranberry-Portage and passengers and freight began to be delivered to that point, the airways company established a sub-base there and from that point the largest number of passengers and greatest tonnage of freight has been handled.

Besides trips to Chesterfield Inlet and Fort Churchill many chartered trips have been made with passengers from The Pas to many other points in the north, including Reindeer Lake, Fort Nelson and Lac la Ronge, but the principal freight business has been from Cranberry-Portage which base was established for the regular freighting business of the company.

During two weeks from the base at Cranberry-Portage nearly 5 tons of freight and approximately 150 passengers were transported to Colo Lake and return.

This great volume of business has been handled by three Fokker Universal planes, the largest one of which has a carrying capacity of 1,500 pounds and the others of 800 each. The successful operation of these planes has been due largely to the efficient pilots who are in the employ of the company. Those who are assisting Major Thompson are Roy Brown and Capt. H. H. Kenyon. It is estimated that they have carried during the season so far upwards of seven hundred passengers.

Operations will be suspended until after freeze-up, which is expected to be about the middle of November. During this suspension the planes will be brought to The Pas and overhauled and the pontoons removed and skiis substituted. This will give the planes three hundred pounds additional carrying capacity.

Courtesy Helped Choice

Why James A. Garfield Decided To Attend Williams College

An Ohio historian, J. H. Galbraith, has discovered the reason why James A. Garfield entered Williams College when he had been undecided whether to matriculate there, at Yale or at Brown. He addressed letters of inquiry to the presidents of all-three, receiving the usual conventional replies, but with one important difference. His answer from the ever-famous Mark Hopkins, of Williams, added the cordial line: "We shall be glad to do what we can for you." Impressed by the courtesy of this response, the future president of the United States decided to go to Williams.

A Quick Rising Plane

Walter Henry Barling, noted designer of the United States army air bombers, is developing a swiftly rising monoplane said to be able to rise after a run of 40 feet.

The Colonel (golfing)—"Confound it, sir; you nearly hit my wife."

Mr. Meeks.—"Did I? Well, have a shot at mine!"

"Don't groan over rowing! Just think of the thousands who can't have a week-end like we are having!"—Lustige Blaetter, Berlin.

W. N. U. 1757

Winnipeg Newspaper Union Fashion

Simple Daytime Mode

A slender model for daytime occasions of mauve-brown flat silk with sheer velvet trimming. It is extremely flattering in its simple styling. Inverted tucks narrow the shoulders; deep V of bodice and front panel lengthens its line. The panel of skirt and belt cut in one with bodice, which makes it very simple to make. Sides of dress are slightly full, gathered to belt. The flared cuffs of long tight fitting sleeves are smart. Style No. 296 can be had in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. Sheer tweed in soft beige and brown tones with vestee of plain beige woolen makes a very serviceable dress for street, classroom, travel or office. Printed velvet, plain black velvet, billiard green wool jersey, patterned jersey with plain jersey contrasting, and black crepe satin are practical suggestions. Pattern price 25 cents, in stamps or coin (coin is preferred). Wrap coin carefully.

Need Clean Books

The school children have no objections to frequent changes in textbooks. A book used by an older brother or sister is not nearly as fascinating to a child promoted to a higher grade as is the brand new book with stiff covers and pages spotlessly clean. And it is stimulating to start clean. We older folks don't take advantage of such an opportunity frequently enough. We keep right on and try to clean up the page that has been hopelessly spoiled.

Blue Eyes For Success

To conquer the North and South Poles and come out safely with flying colors one must possess the most important requisite—blue eyes. That opinion was expressed by Capt. Walter Wandel, 51, and Capt. Oscar Erikson, 65, former sea captains, Klondyke explorers and adventurers who are now conducting a paint manufacturing plant in New Orleans.

Natural Cold Storage Plant

Dug in a glacier at Elephant Point, Alaska, a cold storage plant has proved a boon to the reindeer industry. With picks and axes a tunnel has been cut for 100 feet into the ice, with a shaft through the top for the circulation of air. Several individual chambers can hold about 5,000 reindeer carcasses to await the arrival of refrigerator ships to transport the meat to Seattle.

GIVEN HEARTY WELCOME

Princess Mary and Lord Lascelles were given a hearty welcome when they arrived at Portumna Castle in Ireland, following the burning of Lord Lascelles' stables, and again when the couple attended church and later visited the convent school. Thousands of persons in every walk of life, many of them from distant points, were present to pay their respects to the king's only daughter and her husband.

One Of World's Wonders

Curious Growth On Admiralty Island Has Medicinal Properties

On the north shore of Admiralty Island, lying between the mainland and Vancouver Island, the misty, water-laden fog from the Japan current has the effect of producing a growth of moss, declared by scientists to be one of the natural wonders of the northwest.

The cellular growth starts on the drooping boughs of hemlock and spruce and continues to grow perennially. Specimens of this moss twenty feet long and four feet wide at the point of contact with the branch have been found. These blanket-like growths of moss are so luxuriant and rank as to darken the forests along the shore of the island. Where spruce overhang the water moss keeps on growing after reaching the sea and extends many feet into the beach and tidewater.

Tourists viewing the island from steamers report this moss hanging in long blankets from forest trees gives the impression of many Indian wigwams erected among them.

Recent experiments with this kind of freely growing moss indicate that it has medicinal properties as does the swamp or sphagnum, widely used as surgical dressing in the world war.

Should Not Be Ignored

Common Cold Often Leads To More Serious Disease

A warning against ignoring the common cold has been issued by the medical officers of health for Toronto, Dr. C. J. O. Hastings. "The common cold and its complications," he says, "constitute the most costly and most fatal group of diseases that we have to contend with during the winter season. More than 70 per cent. of all absenteeism from our schools and colleges is due to sickness, and more than 25 per cent. of this is due to common cold and over 40 per cent. of all absence from school during the winter months is due to the respiratory diseases."

Japan To Build Dirigible

Japanese navy officials have completed plans for the construction of a new giant airship which will carry guns and bombs, and have a cruising radius of 3,000 miles, the Tokio correspondent of the Evening News reported. When finished, the dirigible will be by far the largest in the Far East, it was said. Construction of the ship is expected to begin soon.

Minding one's own business is said to be a good method of developing the brain.

Measuring Time By Bell

Method Was In Use Many Centuries Ago

Residents on this continent who are fortunate enough to own specially designed radio sets can, if they please, regulate the course of their daily life and their social engagements by Westminster's famous clock tower. Every day the chime of Big Ben, hung high above the House of Parliament and struck on the 13½ ton bell, is broadcast to the world by an English firm. Transmitted at the incredible speed of the radio waves, it reaches listeners on this continent a fraction of a second earlier than it does the crowds on the streets of London. While enjoying the novelty of catching the distant sound and setting their time-keepers thereby with the requisite allowance for the difference between local and London time, few listeners pause to recall that they are combining both ancient and ultra-modern methods of ordering their daily affairs.

Among the most venerable of associations is that of the bell with the measurement of time. Early in extant historical annals, the bell began to be employed as a summons and a signal. The bell summoned the Roman soldiers to arms and the Roman citizens to the senate chamber—it so identified itself with the Christian faith as a signal for prayer or as a summons to the place of worship that the campanile or bell tower became an integral part of ecclesiastical architecture. The Angelus, the Ave Marie, the vesper bell and the curfew are but a few of the peals ringing out at fixed hours of the day and serving at once their own definite purpose and as an announcement of time intervals.

Though modern life no longer depends upon the bell, and modern noise is apt to drown its vibrations, the bell retains its romantic associations and sentimental value. How strong these are is indicated by the interest displayed in the chime of Big Ben as delivered by radio.

Women and Independence

Reasons Submitted By Members Of Fair Sex For Engaging In Outside Occupations

Girls give many reasons for going on with work after marriage. "It will give me some interest outside of baby's new tooth and the unpaid butcher's bill," says one. "My husban won't be able to say he earns the living while I sit at home with my hands in my lap," snys another. Several want to go on having that sense of achievement, that delight in attacking new problems, which routine housework does not give. Others want "to go on meeting men and women independently," as one does in business. Nearly all want an independent bank account. "Money I have earned by my own work and can spend as I like."

A census form in England states that a woman who is running her own household must fill in her occupation as "None." What this attitude has done to make woman dissatisfied with a home job is incalculable. How many men say, "I do not want my wife to work," when what they mean is that she should supervise the household, meals, economy, upbringing of the children their schoolwork and home occupation, and incidentally, bear them.—Ella Winter in The Delineator.

The following is a bishop's description of the kind of preaching sometimes addressed to fashionable congregations: "Brethren, unless you repent, in a measure, and be converted, as it were, you will, I regret to say, be damned to some extent."

New Style Alarm Clock

For the benefit of deaf people to whom the ordinary alarm-clock is of no use, a new invention of a Bavarian bounces a rubber ball on the sleeper's head at the hour selected.

AU REVOIR

From the cab of the truck transporting him to the airport "Bug" Bear wails "Au Revoir" to Canada as he leaves to take up residence in the United States. The gift of Mayor Houde of Montreal to Mayor Walker of New York, "Bug" was the first shipment to be handled by the Canadian Pacific over its newly inaugurated Montreal-New York Air Express service. Mayor Walker christened him "Bug" in honor of his friend, "Bugg" Baer, well-known journalist of New York.

Instal Automatic Samplers In Wheat Pool Terminals For The Benefit Of Growers

Negotiations carried on by the wheat pools of Western Canada for some months past in connection with the sampling of grain for government inspection have led to the installation of automatic samplers in the Saskatchewan wheat pool terminals number four, five, six, seven and eight at the Head of the Lakes.

After thorough testing of the automatic samplers by the pool inspection department, they were carefully checked over by the Dominion government inspection department, and the chief inspector has agreed to recognize samples taken by the automatic samplers as official samples taken at unload.

Consequently a sample will now be retained at the Head of the Lakes, of all cars of Saskatchewan Pool grain unloaded at Saskatchewan Pool terminals, and these samples will be available for re-inspection purposes whenever required, or in the case of "held full' cars, so that growers who are not advised of Winnipeg grades promptly enough in the ordinary course of events to wire for re-inspection at "unload" before the car is actually unloaded, will now be protected by the retaining of samples of all pool cars for some time after unloading.

This improvement in the sampling system is a result of the work of the inter-provincial grading committee appointed some months ago as representative of the three wheat pools of Western Canada. The committee has under consideration various other matters looking toward the general improvement of the grading system from the point of view of the grower.

Making Good In Canada

British Immigrant Out Only Three Years Buys Half Section Of Land

Bad is more often heard of than Good, and in a similar manner one hears more often of the failure of the British immigrant and his family or the more recent British harvesters in their attempts to make good on the farms of the Western provinces. But every once in a while comes a tale of success.

William V. Evans came out from Hencoed, South Wales, some three years ago with his young wife, to find work in the much-heralded Dominion of Canada, where, between snowfalls, golden wheat grew up and made everyone a millionaire in no time. Soon after their arrival the Evans found work on a farm. The work was new and very hard for a time, but they soon began to gain more experience and with this came confidence in themselves that enabled them to take on more responsible and more lucrative positions.

Now, three years after landing in Canada, Mr. Evans, still a young man with only 24 years behind him, has purchased a fully equipped half-section of land, together with several pure-bred head of stock. This Farm is eight miles north of Horizon, and has the unique record of growing number one Northern wheat for eight years in succession.

Mr. Evans is sure that he "will make a go of it," and points with pride to his wife, who is a farmerette of farmerettes, with her ability to drive a six-horse combination or engage in the numerous duties of a farmer's wife. And then there is their little daughter, who expresses the spirit of their new homeland in her bright, quick and cheery outlook on life.

Mr. Evans has already written to his home in Wales, where he has a number of relatives and friends he hopes to induce to come out to Saskatchewan, which he terms a land of the practical optimist.

Britain Buys Our Cheese

87 Per Cent. Of Exportable Surplus Last Year Was Shipped To United Kingdom

Eighty-seven per cent. of Canada's export of cheese last year was shipped to the United Kingdom—the amount being 119,000,000 pounds—according to Dr. J. A. Ruddick, dairy and cold storage commissioner for the Dominion, who recently returned from an extensive tour of the British market centres. The Canadian grading system had gained the confidence of the British importing trade, said Dr. Ruddick, and the largest operator in Canadian cheese on the other side told him that he never examined the cheese that he bought from Canada but depended entirely upon grade marks and the grader's certificate.

Just One Course

"When you sit down to pack in the fodder in central or lower Arkansaw," said Bertram L. Froehly, in a reminiscent mood, "you look for the menu and find "they haint none," But the chocolate gent standing at your back, says softly into your ear as he places a cup of hot coffee at your right: "How'l y' have y'r ham an aigs?" That is in some parts of the Central or Southern States. Where I was compelled to spend a night, it was somewhat different. My waiter asked very decidedly: "Soup, sah?"

"I did not look up, for I expected a query pertaining to fodder and I just replied casual like. "No, I don't care for soup."

"'Dinnah's ovah,' said the waiter."

Perfectly Safe

Sandy M'Gregor was travelling to Glasgow, and on the way he felt thirsty, so he took out his bottle and drew the cork.

As he was about to take a "taste," a fellow passenger, in clerical garb, addressed him—

"Excuse me, sir, but I am 65 years of age, and I have never tasted a drop of whisky."

"Dinna worry yersel," replied Sandy, "yer no' gaun tae start noo.

The man who is down in the mouth seldom gets up in the world, says the Ottawa Journal. And the one who is up in the world has little reason for getting down in the mouth.

Wife (to husband driving car)—Put it in reverse gear now, George, I want to go home.

New Telephone Device

Receives Messages When Telephone User Is Absent, It Is Claimed

John Collins, Waco, Texas, demonstrated before a meeting of the Independent Telephone Association, at Chicago, an "Ansophone," which, when installed in the telephone, will receive messages when the telephone user is absent and later transmits them in the sender's own voice to the person for whom the message was intended.

The returning housewife of the future, it was pointed out, on returning home from marketing may expect to find anything when she turns on the telephone, from the latest neighborhood gossip to a message from the husband that he won't be home for dinner.

Unnecessary Suffering

Suffering is not always a blessing in disguise. Sometimes it is an undisguised evil, something in which we indulge because we like to be martyrs. Self-denial for its own sake is only a foolish refusal of pleasures that we might rightfully enjoy. And often when the outlook is darkest, we have no right to suffer; the only way to meet the future is with faith and courage and the readiness to smile.

Indians Making Money

Indians on the Blackfoot reserve, already wealthy, are fast adding to their healthy bank accounts. As the result of a recent shipment made by a few of the cattle owners, the Indians netted $26,000, the steers averaging $108 each, according to word to reach the head office of the Indian Department for the prairie provinces, which is located in Regina.

Fame Spread To Ontario

Having heard so much about the high quality of the goats in British Columbia, Mrs. A. Williams, of G. & A. Williams, Honeywood Goatery, Oakville Ont., recently visited that province, and she left for home with three high producing grade Saanens. She also made arrangements to secure one or two buck kids next year as well as some does.

Cholly (dramatically)—Miss Ethelyne, I have lost my heart!

She (fixing him with a steel-gray look)—Why don't you advertise?

The Acrobat Family which only had one umbrella. Der Germutliche Sachso, Leipzig.

WORLD HAPPENINGS BRIEFLY TOLD

The radio audience of the United States is 41,453,496, according to a survey made public by the National Broadcasting Company.

An airport for Halifax to be equipped by the government is planned as a result of the visit of Major Tudhope, inspector of air routes for the Department of Civil Aviation.

The small one-room building, formerly used as an office by Luther Burbank, plant wizard, will be taken to Detroit as an exhibit in the Ford historical museum.

A movement is now under way in Turkey to abolish the title of "Pasha." Originally a military honor, the title is now granted to persons of high rank.

More than 7,000 pieces of mail have been received at the New York post office for mailing with the Graf Zeppelin on its return flight. The fee is $1 for letters, and fifty cents for postcards.

Leong Ying, Chinese awaiting execution at San Quentin prison for the murder of ten of his countrymen in the rice fields near Fairfield, Zolono County, was found dead in his cell in condemned row.

There will be no changes in the Ontario liquor control act at the next session of the legislature, Hon. W. H. Price, attorney-general, declared, commenting on reports that the act would be amended.

The first regular through air mail from White Horse to Dawson left White Horse recently. Captain T. G. Stephens hopped off with the Fairchild plane now in the service of the Gheenfield and Pickering Royal Mail Line, with 650 pounds of first class mail for Dawson.

A Wonderful Chance

Minister: I wish to announce that on Wednesday evening the Ladies' Aid will have a rummage sale. This is a chance for all the ladies of the congregation to get rid of anything that is not worth keeping, but is too good to be thrown away. Don't forget to bring your husbands.

Man (just acquitted, to counsel): "Thanks very much. What on earth should I have done without you?"

Counsel: "About five years."

Monaco was an independent principality for 800 years until the reigning prince was dispossessed by the French Revolution.

Canadian Club Activities

Extension Of Speakers' Itineraries Is Planned At Ottawa Meeting

Extension of speakers' itineraries for Canadian clubs, enlargement of the Canadian Club Magazine, radio programmes, and organization policy were discussed at Ottawa, at the first meeting this autumn of the executive committee of the Association of Canadian Clubs. C. G. Cowan, of Ottawa, was re-elected chairman of the executive.

Miss Katherine Evans, formerly of Winnipeg, was appointed to the permanent staff of the association. She is a daughter of W. Sanford Evans, M.L.A., one of the two founders of the Canadian Club movement.

The executive issued instructions to the national office to arrange 1,000 meetings for the 120 Canadian clubs in the Dominion and discussed the use of the radio for broadcasting Canadian club addresses and concerts. A National Canadian Club Radio committee will be appointed at the next executive meeting to make arrangements for the broadcasting.

London Solves Garage Problem

Cars Are Sunk Into Concrete Pit In Garden

To sink a car underground and make it reappear, when wanted, by pressing a button, is the latest contribution to the garaging problem. Many even of the post-war houses in London, have not sufficient side-space to erect a garage, and "building-line" regulations prevent structures being put up in the front garden. The new invention overcomes these difficulties. A concrete pit is sunk in the desired position, and machinery is installed for raising or lowering a platform carrying the motor car. A canopy is fitted to the platform, so that when it is sunk to the level of the ground it forms a weather-proof shelter for the garage. The device, it is claimed, is both burglar-proof and foolproof, the machinery being operated from inside the house by simple control push buttons.

Marie: "If you could have two wishes, what would they be?"

Viola: "Well, I'd wish for a husband."

Maria: "That's one."

Viola: "And then I'd save the other till I saw how he turned out."

"Daddy, what is dew?" asked Bobby.

"The rent, the note at the bank and the instalment on my car," growled his dad.

Farm Booklets

A wealth of information for farmers and housewives is offered free by the Dominion Department of Agriculture. Write for what you want post free.

"Poultry Feeds and Feeding" gives the latest and best methods of feeding chickens, turkeys, ducks, and geese for market. No charge. Use the coupon.

Free Index Book

For convenience in filing the many Agricultural Department Booklets available to farmers and housewives, the Publications Index Book is issued free for the asking.

Publications Branch,
Dominion Department of Agriculture, Ottawa

Please send me booklet on Preserving, together with full list of Booklets and the Index Book.

Factories On the Prairie

Western Canada Becoming An Attractive Field For Industrial Enterprise

Factories are beginning to dot the prairies of Western Canada. The process of industrialization which has gone on in other lands is noticeable in Manitoba, Saskatchewan, and Alberta. In these provinces, usually regarded as purely agricultural, there are now 2,210 factories, with an invested capital of $233,857,270. The employees number 36,436; the annual wage bill is $46,179,949, and the value of manufactured products $163,252,180.

Manitoba leads the three prairie provinces in the volume of its manufacturing industry, with an annual output of $132,718,452. Alberta follows with $83,425,631, and Saskatchewan is third with $47,108,097.

Flour mills contribute a large share of the total production, with an annual value of $51,113,136. Slaughtering and meat packing follows with $33,085,850. Butter and cheese account for $23,432,378. These industries are the natural outcome of farm production. More remarkable are items like these: Railway rolling stock, $10,286,727; electric light and power, $12,262,168; bags, cotton and jute, $5,077,484; petroleum products, $8,424,434.

With increasing prosperity and increasing farm production Western Canada, as the figures disclose, is becoming an attractive field for industrial enterprise.

Winnipeg Newspaper Union

Fashion

A Smartly Simple Frock

Charmingly youthful is the cute frock shown here. The flared skirt is joined to the scalloped bodice having short kimono sleeves, or long sleeves gathered to wristbands, a convertible collar, and tie slipped through slots at front. No. 1629 is for misses and small women, and is in sizes 16, 18 and 20 years. View "A," size 18 (36 bust) requires 3⅛ yards 39-inch (36 bust) requires 3⅛ yards 39-inch, or 2¼ yards 54-inch material. View "B" requires 1⅞ yards 39-inch striped material, and 1½ yards 39-inch plain. Price 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

Prove It For Yourself

Write down the number of your living brothers and sisters. Multiply it by two. Add three. Multiply the result by five. Add the number of living sisters. Multiply the result by ten. Add the number of dead brothers and sisters. Substract one hundred and fifty from the result. The right figure will be the number of deaths, the middle figure the number of living sisters, and the left hand figures the number of living brothers.

He—I've come to a conclusion.

She—What is it?

"I realized today that I have been a bachelor for 38 years, and——"

"Oh, Jack, this is——"

"And I decided I'd had a jolly good time and that I'd keep it on."

SUNDAY SCHOOL LESSON

NOVEMBER 4

WORLD'S TEMPERANCE SUNDAY

Golden Text: "Love worketh no ill to his neighbor; love therefore is the fulfilment of the law."—Romans 13.10.

Lesson: Romans 13.1-14.

Devotional Reading: Psalm 15.

Explanations and Comments

Obedience To Civil Authority a Christian Duty, verses 1-7.—"Is it lawful to give tribute to Caesar, or not?" was the burning question which the Pharisees brought to Jesus, and you recall how He answered, "Render unto Caesar the things that are Caesar's, and unto God the things that are God's." A great part of the Jews were always questioning the lawfulness of paying taxes and of recognizing the authority of the Roman Government. The Jews of Rome had been especially turbulent, and of this Paul must have heard many accounts from Priscilla and Aquila, who had been forced to leave Rome on account of the trouble. In writing to the Romans, therefore, Paul was naturally led to take up the question of the Christian's relation to the civil authority.

"Let every soul be in subjection to the higher powers—those in authority, the civil rulers, he counseled, and then by means of two clauses, one negative and the other positive, he asserted that the fact of the authority being established argues that it was ordained of God.

"The Roman Empire maintained law and order, protected life and property, and was on the whole, as Paul believed, a beneficient power. Nero, the reigning emperor, was, it is true, a dissolute young man who often arbitrarily did as he pleased with the lives of his subjects, but at the time Paul was writing, persecution of the Christians had come from other Jews or from popular riots, and not from the Roman Government. At Pnphos (Acts 13), Thessalonica (Acts 17), Corinth (Acts 18), and at Ephesus (Acts 19), Paul had found the Roman officials a restraining power to his persecutors. Noteworthy is it, that after Paul had appealed to Rome and had been kept in confinement for some time without trial, he wrote to Timothy, 1. Tim. 2.1, 2; "I exhort therefore, first of all, that supplications, prayers, intercessions, thanksgivings, be made for all men; for kings, and for all that are in high places, that we may lead a tranquil and quiet life in all godliness and gravity."

"If our laws are not Christian, then it is our business to make them Christian; if those in authority do not represent Christian ideals, we are not to deny authority, but to secure legislators and governors whose ideals are Christian. We are more fortunate than those to whom the apostle wrote; we have some say about the laws which are to be enacted and the officials who execute them."—Galus Glenn Atkins.

Recipes For This Week

(By Betty Barclay)

SIRLOIN AND BACON SURPRISE

1 cup bread crumbs.
¼ cup evaporated milk diluted with ¼ cup water.
1 egg.
1 lb. chopped sirloin steak.
3 tablespoons lemon juice.
1 teaspoon salt.
1-3 cup grated cheese.
1 tablespoon chopped pimiento.
2 tablespoons chopped green pepper.
6 green olives.
Bacon slices.

Soak bread in diluted milk five minutes. Add slightly beaten egg, then mix all together. Form into balls. Roll each in a slice of bacon and bake in a moderate oven half an hour. Yield: 5 servings.

ROLLED FRUIT WAFERS

½ cup butter.
1 cup sugar.
Grated rind 1 orange.
1 teaspoon soda.
1 tablespoon cold water.
½ cup orange juice.
2 cups flour.

Cream butter; gradually add sugar and orange rind, beating until light; dissolve soda in cold water; add to orange juice, then add, alternately with flour, to first mixture. Spread mixture on well-buttered sheet in the thinnest possible layer, and bake in a moderate oven. When baked, cut in squares; quickly roll each square, while hot, over handle of a wooden spoon, and arrange on a doily-covered plate.

Importing Fewer Potatoes

According to statistics from Washington, Canada's importations of American potatoes have declined from 919,783 bushels in 1924, to 479,596 bushels in 1927, owing largely to the increasing production of potatoes in the Dominion.

Conveys Mail Underground

The railway that runs beneath London, a distance of six and a half miles, and conveys letters and parcels between Whitechapel and Paddington, gives a service of about 850 journeys a day at an average of 20 miles an hour.

CUTICURA Promotes Loveliness Of Skin And Hair

Daily use of the Soap, assisted by the Ointment when required, keeps the skin fresh and clear and the hair healthy and glossy. They are ideal for the toilet, as is also the smooth, cooling, fragrant Cuticura Talcum.

Sample Each Free by Mail. Address Canadian Depot: "Stenhouse, Ltd., Montreal." Price, Soap 25c, Ointment 25 and 50c. Talcum 25c.
Cuticura Shaving Stick 25c.

ONE-DISH DINNER

In many families it is a problem to serve up a simple meal on one course. Here is a dish that will please a family of six, besides having the indispensable elements of nourishment:

2 cups cooked macaroni.
1 cup cooked carrots (diced).
2 tablespoons grated onion.
2 tablespoons chopped parsley.
2 tablespoons chopped fresh red pepper.
1 cup chopped ham.
6 tablespoons buttered crumbs.
1 cup Borden's St. Charles Milk.
1 cup water.
2 tablespoons butter.
2 tablespoons flour.
1 teaspoon salt.
⅛ teaspoon paprika.

Cook macaroni in boiling salted water 35 minutes. Make a white sauce of butter, flour, milk, water, salt, paprika. Place a layer of macaroni in a well-greased baking dish. Sprinkle with ham, carrots and seasonings. Repeat until all are used. Pour over all the white sauce. Cover top with bread crumbs and bake in a moderate oven for 40 minutes.

Dog Beats Swimming Record

Swimming 153 miles from Albany to New York, in 44 hours 52 minutes, a German shepherd dog bettered man's record for the swim by about five hours. The dog swam two hours at a stretch and, like other swimmers was coated in grease.

A University of Chicago professor invited to address a club meeting, chose as his subject "The Need of Education." The following day a newspaper headline reported "Professor's Speech Shows Need of Education."

Reason For Butter Shortage

More Milk Made Into Cheese On Account Of High Prices

As the end of the dairying season approaches, there are 8,800,000 pounds less butter in cold storage in Canada than last year. Figures published by the Dominion Bureau of Statistics show 29,129,000 pounds in storage on Oct. 1, as compared with 38,009,000 pounds on the same date in 1927, and 32,175,000 pounds for the five-year average.

A similar depletion of cheese stocks is revealed. There were 27,793,000 pounds in storage on Oct 1, a decrease of 7,977,000 pounds from last year's total of 35,770,000 pounds. The five-year average was 30,348,000 pounds.

The quantity of cheese graded up to the end of September of this year was 1,219,150 boxes, as compared with a total of 1,163,208 boxes for the same period in 1927, or an increase of 55,912 boxes.

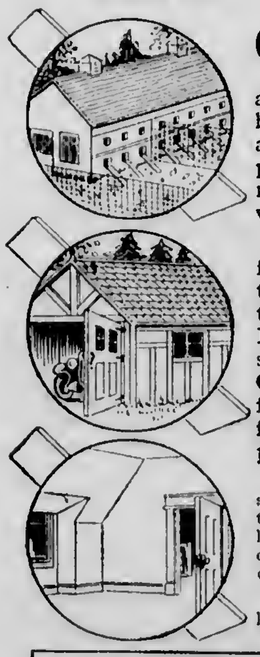
The reason ascribed by Department of Agriculture officials for the lower stocks of butter and cheese this year as compared with last year is the higher prices prevailing for cheese in the export markets. More milk was made into cheese and less into butter as a result and both products have been exported quickly to meet the outside demand.

City Nephew (in art gallery): "That Aunt, is the 'Angelus' by Millet."

Rustic Aunt (on summer holiday): "What a shame! The man has actually copied the calendar that's hung in our kitchen for twenty years!"

The shadow of a trouble is usually blacker than the trouble itself.

FIREPROOF
Farm Construction



GYPROC Fireproof Wallboard is used in the building of elaborate country homes equally as much as for garages; grain bins, poultry houses and barns. For repairs and alterations — for remodelling — for partitioning off extra rooms—it is the most economical and satisfactory wallboard on the market.

Gyproc protects from cold, heat, fire, sound and vermin—yet costs less than materials which do none of these things. Quick and easy to apply. It can neither crack, warp, bulge or shrink. By filling the joints with Gyproc Joint Filler you get a smooth, flat, air-tight surface through which fire, heat, cold and sound cannot penetrate.

Gyproc comes in broad, light, ceiling-high sheets of gypsum rock. Takes any decoration—and is especially suitable for Alabastine. Fuel saved by the insulating qualities of Gyproc will alone pay for the cost within a few seasons.

Clip and fill in coupon for interesting free booklet.

Premier King Returns To Canada After An Absence Of Two Months

Quebec, Que.—After an absence of more than two months, during which period he represented the Dominion on a number of historic occasions, Premier Mackenzie King returned to his homeland Saturday. Looking in splendid health, and glad to be back in Canada, the Prime Minister, who was accompanied on his return voyage to Canada by Hon. C. A. Dunning, minister of railways and canals, Hon. Raoul Dandurand, government leader in the Senate, Senator W. L. MacDougald and Senator Andrew Haydon, sailed up the St. Lawrence River to land at Quebec.

Mr. King told of some of those things which took him to Europe, of the welcome he received everywhere, of the high place which Canada has achieved in the minds and hearts of European nations, and of the benefit which had accrued from his sojourn in Great Britain and on the continent.

Peace, and Canada's part in perpetuation of peace in the world, formed the theme of much of what Mr. King had to say.

"The peace of the world depends more on good relationship between the United States and Great Britain, and Great Britain and France, than on any other single factor," said the Prime Minister in this connection. He pointed out, in the development of this happy relationship Canada held a key position. The Dominion understood and could interpret the French, the British and the United States character. She was qualified to act as the interpreter nation. With her understanding of all their peoples, she held it in her power to cement closer and closer the bonds which existed between them.

"Europe will have to come to the new world point of view," said Mr. King, in referring to efforts for world peace.

"The new world," he continued, "could present the old world with a practical example of the effectiveness of disarmament as a means of perpetuating peace. Canada and the United States had demonstrated the value of arbitration and conciliation in international affairs ever since the Rush-Bagot treaty became effective."

B.C. Heads Winners

Canadian Egg Laying Contest Just Completed At Ottawa

Ottawa, Ont.—Fourteen hundred hens have just completed 51 weeks' laying in the Canadian and Ontario laying contests at the experimental farm here. Premier honors in the Canadian contest go to a pen of White Leghorns owned by T. H. Haywood, of Langford, B.C., the ten hens laying 2,374 eggs for a total of 2,329.4 points. W. Bradley, owner of the second pen, White Leghorns, also hails from Langford. His birds laid 2,265 eggs and secured 2,220.5 points. Ontario claims third place through another pen of White Leghorns, owned by J. H. Jackson, of Port Dover. This pen laid 2,100 eggs and scored 2,178.8 points.

The 800 birds in the Canadian contest laid 131,999 eggs in the 51 weeks, which now constitutes the contest year.

Want To Find Owners

Philadelphia.—The United States government has joined forces with District Attorney Monaghan, who is directing the grand jury investigation of rum runners and police corruption, in his efforts to identify the mysterious owners of 16 bank accounts, totalling nearly $12.000.000. Monaghan believes the money was deposited by bootleggers, and the federal government wants to determine whether income taxes were paid on funds.

Overcomes Gravity Force

Strange Claim Made In England By Young Scientist

London, Eng.—R. H. Tate, young scientist, claims to have overcome the laws of gravity, according to despatches recently from West Hartlepool to the Daily Express.

The experiment was demonstrated in a secret laboratory test, when a piece of metal—absolutely unattached to anything—was suspended in mid-air, the despatches said.

Tate placed on the floor the metal which was said to resemble aluminum but was of a composition heretofore unknown, and placed a similar piece of metal above it in the air. The top metal remained suspended—not for just a moment, but for as long as Tate left it there.

"I have eliminated the force of gravity," Tate said. "The metal is not insulated and it is thought that the practical possibilities of the discovery are apparent. I have discovered the new force from known forces, by eliminating gravity from the metal. The composition of the metal is known only to myself, but among its possibilities is the controlling of aircraft from the ground."

Experts said that, if true, the discovery would be the greatest in centuries.

Recapture Four Prisoners

Men Who Escaped From Burwash Industrial Farm Again In Custody

Sudbury, Ont.—Four prisoners of Burwash Industrial Farm, who broke away from the drug addicts' camp, were recaptured after guards had frightened them into submission by firing shots over their heads.

The fugitives were sighted about 16 miles North of Burwash, on the Canadian National Railways, by Guards Benson and Tomie, but at first refused to surrender and threatened to offer strenuous resistance. The two young guards, however, drew their revolvers, firing high, and when the men saw their pursuers meant business finally gave in.

Arm River Election

Dr. Waugh, Liberal Candidate Wins By Narrow Majority

Regina.—The government candidate, Dr. J. T. Waugh, captured the vacant seat in the Arm River bye-election, having a majority of some fifty odd votes over his opponent, Stewart Adrian. Owing to the favorable weather and the unprecedented interest taken in the campaign, a heavy vote was polled. The total number of voters on the list is in the neighborhood of 6,000, and the total votes polled amounted to 5,517, or 91 per cent. of the possible vote.

Fight With Wolf

Chicoutimi, Que.—A wolf driven from the woods by hunger attacked a 70-year-old farmer, Joseph Girard, a resident of Ste. Rose de Lima, Saguenay district. Ten minutes after he had grappled and fought with the animal, the septuagenarian won the fight and the wolf lay dead. The man's only weapon was a staunch stick.

Postpones Pacific Flight

Tokio.—Baron Gunther Von Huenfield, who recently completed a flight here from Germany, said he considered the season too late to attempt a flight across the Pacific. He was undecided how he would return to Germany.

COLONIZATION PROBLEMS

COL. J. S. DENNIS, C.M.G.

Chief Commissioner, Department of Colonization and Development, Canadian Pacific Railway, who, for over fifty years, has been active in Canadian land settlement. An outstanding authority on Canadian immigration and colonization problems, he has recently concluded important plans with the British Government for the movement of British settlers to Canada.

Planning New Air Routes

Russia Wishes To Supplement Inadequate Railroad Service

Moscow.—More than 5,000 miles of new air lines will be opened in Soviet Russia next spring by the Soviet Air Transportation Company "Dolhrolot." The planning work is under way. The lines in every case are being laid out to supplement inadequate railroad service in the east and southeast.

Siberia, for the first time, will be connected with the European network of passenger and mail air routes, which now extend to Moscow. A daily service, 2,000 miles eastward to Irkutsk, near the Mongolian border, will be started in May in co-operation with the German Luft Hansa. With night flying, the distance will be covered in from 26 to 30 hours. It now takes five days by train.

Another air line will connect Alma Ata (where Leon Trotsky is in exile) with Novosibirsk over the route of the uncompleted Turkestan-Siberian railway. Several new lines are planned in the Volga Valley. German Junkers planes will be used upon all the lines.

Would Use Submarine To Explore Antarctic

Wilkins Hopes To Have Assistance Of British Government

Montevideo, Uruguay.—Antarctic exploration by submarine is a possibility which is being considered by Sir George Hubert Wilkins. He spoke of this just before he sailed from here on the Whaler Hektoria for Deception Island, where he intends to establish a base for exploration by air of large spaces in the Antarctic.

He indicated that it might be two years before he was ready to undertake the submarine exploration and that he hoped the British Government would then be willing to aid him. The boat would be used to gather data on ocean currents and sea life and chemistry.

Less Smallpox In Europe

Geneva.—Smallpox in European countries has markedly decreased during the past few years, according to a report just issued by the Health Organization of the League of Nations. Great Britain is the single exception, there being a steady increase in the number of cases, officially reported since 1920.

Straits Clear Of Ice

No Ice Yet Reported To Be Seen On Hudson Straits

Ottawa, Ont.—No ice is reported in Hudson Straits, according to the latest radio message from the wireless stations there. A few icebergs and growlers have been seen, while there is a film of ice on the lake shore, but in the seaway proper, the ice has not yet appeared. The Canadian government seamer, Montcalm, with the party in charge of Major N. B. McLean, of Ottawa, is at present lying off Button Islands, at the extreme tip of Labrador. Major McLean will remain there until all navigation in the straits has been closed.

The string of wireless stations along the straits and on to Churchill, are in close touch with each other, and with the Federal Department of Marine and Fisheries in Ottawa. Wireless developments have been added to by the establishment of a private station, at Mistake Island, 150 miles north of Fort Churchill, by the North American Mining Exploration Company, and another station has appeared at Baker Lake, in from Chesterfield Inlet.

Holding Swine Club Tests

Winning Teams Will Go To Royal Winter Fair

Winnipeg, Man.—Preliminary arrangements have been completed by the Canadian National Railways for the interprovincial boys' and girls' swine club competition, which will be held on November 21, at the Royal Winter Fair, Toronto. Six provinces will be represented this year and the results of the provincial competitions will decide the teams which are to go to Toronto.

Teams from each province will be the guests of the National system during the week of the Royal Fair, and the entertainment of the boys and girls will include a trip to Niagara Falls and a visit to the Donalda Farms, just outside of Toronto.

In the past two years teams from Roland, Manitoba, have won and successfully defended the W. D. Robb Trophy, which is emblematic of interprovincial championship. The cup is held by the winning team for one year. Gold medals are presented to the winning team from each province.

Five Thousand Miners Remaning In Canada

Have Until February To Return Under Special Arangements

Winnipeg, Man.—Of the 8,500 British miners who came to Canada this year to work in the harvest fields under government auspices, 3,800 have returned home, according to officials concerned in their handling.

A considerable number still are in Winnipeg waiting for jobs in their various trades, while farm placements for those still in the country have been arranged in many cases.

The special arrangements under which the men were brought over permit their return to the Old Country up to next February, after which official responsibility will cease.

Appointed Swedish Consul In Winnipeg

Albert Hermannson Will Represent Sweden and Finland

New York, N.Y.—The American Swedish News Exchange of New York has received a radiogram from Stockholm announcing the appointment of Albert Hermannson, former member of the Saskatchewan legislature, as Swedish consul in Winnipeg.

Mr. Hermannson, now a resident of Winnipeg, has been acting as vice-consul for Finland in Winnipeg, and he will now represent both countries.

Says Great Britain Not Building Navy To Compete With U. S.

New Elevator Opened

Members Of Prairie Wheat Pools Attend Ceremony At Port Arthur

Port Arthur, Ont.—Pool terminal elevator number seven, the world's largest single unit elevator, with a capacity of 7,200,000 bushels of grain, was officially opened in the presence of forty members and directors of the Saskatchewan, Alberta, and Manitoba wheat pools.

A. J. McPhail, president of the Saskatchewan Co-operative Wheat Producers, Ltd., officiated at the opening and with him were C. H. Burnell, president Manitoba Pool and L. D. Newbitt, representing the Alberta Pool. The elevator is owned and operated by the Saskatchewan Pool Elevators Ltd., with headquarters at Regina. The building is 1,100 feet long, has 225 storage tanks, and 558 inter-space and outer space bins.

The tanks are 125 feet high and the work house is 210. The work was done in the record time of 149 days from the time the first concrete was poured.

Wheat Pool Makes Denial

Are Not Holding Up Wheat Shipments In Order To Raise Prices

Winnipeg, Man. E. B. Ramsay, secretary of the Manitoba Wheat Pool, has denied charges that the Canadian Wheat Pool is holding up shipments of wheat, and thus increasing the cost of flour and bread in England.

"Nobody in Canada is satisfied with the present level of wheat," declared Mr. Ramsay. However, we are not retarding shipments, but on the other hand, are not free sellers on the present price levels," he added.

From the point of view of the Canadian farmer, Mr. Ramsay continued, the prices are considered too low at present and "we find that the non-pool members are also of the same opinion." The non-pool members, he added, are storing their grain, awaiting acceptable prices.

Clean Law Administration

British Columbia Will Not Resort To Use Of "Stool Pigeons"

Victoria, B.C. - "Stool pigeons" must not be employed by British Columbia provincial police under a policy announced by Hon. F. H. Pooley, attorney-general.

"The police of this province are going to operate on a clean, aboveboard basis and the use of stool pigeons will never form a part of their methods," Mr. Pooley said, adding. "The police will never use agents to persuade persons to break the law in oredr to get convictions. Practices of that kind cannot be tolerated."

London, Eng. Great Britain has no idea of building a navy in competition with the United States, said Stanley Baldwin, Prime Minister, when he spoke recently at a great mass meeting in Albert Hall in celebration of the tenth anniversary of the League of Nations union.

He expressed profound regret at what he declared was only a "temporary failure to reach an agreement with the United States on naval matters and he also described the suspicions governing British action which he said, had gained currency in some American circles.

"Our policy in naval building is to go slowly. We have no intention of competing with the United States and we came to the decision to go slow long before we were asked to sign the Kellogg pact.

"We are grateful to Mr. Kellogg for bringing the treaty to Europe. It gives it what in our life we should be grateful for, an opportunity for a fresh start. I doubt whether the world yet realizes the import of the Kellogg pact."

The Prime Minister concluded with an appeal for faith in the League of Nations as an instrument of peace.

Earlier in his address he alluded to uneasiness reflected in some British newspapers recently who thought that by the Franco-British naval accord this country had been committed to the French view concerning army reserves without obtaining any adequate naval concession.

"I wish to contradict the idea that we have abandoned our position of impartiality adopted at the time of the Locarno pact," said Mr. Baldwin. We have made no new engagements and there has been no change in the orientation of our policy.

"Our interests and our inclinations have alike prompted us to preserve and even strengthen the solidarity of our relations with Germany, as well as with France and Italy."

Mr. Baldwin dealt with the evil influence of war on national character particularly as illustrated in the world. He said that this showed mankind descended not only from the ape, but has inherited characteristics of the tiger.

"The tiger is very close to the surface," he said. "If the state is to survive, the tiger must be eliminated, but our experience of 13 years ago showed that these base instincts are ready to be summoned from their hidden lair at a moment's notice.

"No two bodies of persons are more potent to summon these ancient impulses than are the politicians and the press. Only an intense spiritual light can resist these instincts."

Decline In Unemployment

Ottawa, Otn.—There was a further small decline in unemployment at the beginning of October, when, 6,627 employers had staffs aggregating 998,851 persons as compared with 1,003,691 the preceding month.

Proposal Is Made For A New League Of Great Powers Only

Colorado Springs, Colo. A new League of Nations composed of great powers only and including the United States, was proposed by Ralph D. Blumenfeld, editor of the London Express and head of the British Journalistic Mission touring this country under the auspices of the Carnegie endowment for international peace.

The present League of Nations, he said, has become hopelessly ineffective and a danger to international relations.

Blumenfeld said the League was hamstrung by its own cumbersome constitution and was now a "germ carrying talking machine, an overgrown bureaucratic debating society which is a fulcrum for every crank idea."

In its place, he proposed a League of Nations which would be the result of spontaneous agreement between Great Britain and the United States, without elaborate treaties. Each of the powers, under his plan, would keep order among the minor states.

"There's no country in the world that wants peace so much and so ardently as Great Britain," said the London publisher. "Great Britain still feels her enormous losses in men, money and material and the disruption of generations of trade connections through the world. She wants a chance to recover from the catastrophe that not only overtook her but the rest of the world."

To Submit Report On Work Accomplished At Churchill This Year

Ottawa, Ont.—The department of railways and canals soon will issue a statement giving full particulars of the season's work at Fort Churchill. S. W. MacLachlan, chief engineer of the department, has just returned from an inspection tour and the statement will be based upon his report.

It is understood that the construction on the harbor works is proceeding and the entire program for the season was accomplished.

The port will not be ready for shipping as quickly as the railway, but this is said to be unavoidable unless the government spends a large sum of money in overcoming the difficulties in building due to the present inaccessibility of the harbor.

When the railway is completed it will be easier to take in supplies and workmen.

There were no accidents this season and the department is pleased with the progress being made.

INTERESTED IN HANDLING OF GRAIN CROPS

F. R. Newman, Vice-President Soo Line, together with 50 representatives of the Soo Line, Spokane International, and South Shore Railways watching carloads of grain passing through the vast Canadian Pacific Railway yards at North Transcona, Winnipeg. They saw trainload after trainload of Canada's greatest crop being handled over the "hump."

Work Done On H. B. Ry. Amazing

Road Bed Compares With Best Anywhere On Continent

Towns are rapidly springing up along the line of the Hudson Bay Railway where a year or so ago there was scrub, spruce and muskeg and along the railway a rusty uneven track which suggested nothing so much as an abandoned enterprise. The volume of work which has been accomplished since reconstruction began is quite amazing.

While the road is still under construction the emphasis is being placed on the road bed itself, and this is as far as mile 336 which is three-fifths of the way to Fort Churchill, in accomplished fact a masterpiece of railway building, and will compare with the best road beds anywhere on the continent.

It is 510 miles from The Pas to Churchill. Steel is at present laid to mile 430. Passenger trains are running to Mile 412, but the freight service terminal is at mile 426. While the road for the most part crosses muskeg on its way to the North it should not for that reason be regarded as on an unstable foundation.

The term "muskeg" should not be confused with "bog." Bogs occur at rare intervals along the route, and are always referred to as "sink-holes." If the vast quantities of rock which it is necessary to dump into these places to make them passable, were visible the roadbed would appear to be merely a high grade such as might be built across a prairie ravine.

Muskeg is an accumulation of leaves, muck and moss, which occurs all over the North country up to the region of the barrens. It may be a few inches or several feet in depth above its foundation of solid rock, and is present right to the very edge of the chasms through which northern rivers pass.

New stations are built all along the finished line. Clearwater Lake at mile 17 is rapidly becoming a summer resort. With the exception of the summer cottages at this point there is practically no building until mile 39 is reached. Here there is a great deal of activity in quarrying the red marble, several carloads of which have been shipped out.

At Cormorant Lake, Mile 42, the Dominion Government Aerial forest patrol is situated. This is an ideal place for an air-base and there are at present four 'planes operating from the point. There are several homesteads in this locality, and some noteworthy gardens have been visible from the railways during the summer months. There is a public school in operation, and as there is a thriving little business community and the place is becoming quite a popular summer resort, the residents are looking for a prosperous future.

Method Declared Legal

Selling for shaves is a new method of transacting business, introduced by two brothers at Moravia, Iowa. They have sold eighty acres of land in Missouri to a Moravia barber for 1,000 shaves. The barber will exercise his tonsorial art free upon the two brothers at their demand, until the debt is liquidated. The transaction was duly legalized.

Tree Saving Costly

A campaign has been started at Neligh, Nebraska, to raise money for a surgical operation upon Nebraska's oldest elm tree that was struck by lightning. The tree is 165 years old. It will require $400 to give the tree proper care and prevent its dying, experts said.

New C.P.R. Liner Launched

The new Canadian Pacific liner, "Duchess of York" was launched at Clydebank, Scotland, on September 28th, by Her Royal Highness the Duchess of York. H.R.H. the Duke of York and other notables were present. The vessel is of 20,000 tonnage.

"Please, sir, be kind enough to show me how to skip!"—Buen Humor, Madrid.

Possesses Valuable Secret

Scientist Studying Whale's Ability To Remain Under Water An Hour

To open the way for the discovery of an appliance that will enable man to remain under water and survive, Dr. A. Brazier Howell, anatomist, who has just joined the Faculty of Johns Hopkins University, is making a study of the whale.

The whale possesses a secret which, if it could be comprehended, might be of incalculable benefit to man. That is the method of disposing of the carbon dioxide which he generates in his blood during long periods under water, sometimes exceeding an hour. Some chemical adjustment takes place in his body which makes it possible for him to consume his own poisons or dispose of them. An understading of this process, Dr. Howell explained, might lead to the invention of an appliance which would have a definite bearing on submarine and mine disasters and the work of rescue.

If the chemical formula by which the whale "consumes his own smoke," so to speak, could be found, Dr. Howell asserted, science might be able to reproduce the condition in the human body. That is only one reason which has turned Dr. Howell to studying the whale, which, he says, is the only one of the higher mammals that can stand the water pressure at the depth of a mile.

Worked Under Difficulties

Ontario Government Cameraman Met With Opposition In Some Countries

J. G. Rutherford, Ontario government cameraman, who is home after a world tour of 30,000 miles in seven months, took his machine to places where movie men have never before worked. The Moors of Gibraltar were indignant, because it was against their religion to be photographed. Attempts were made to record the wives of the Sultan of Bima, but the ruler's objections were found too strenuous, while the Dutch government would not permit the photographer to "shoot" the giant lizards there. It is reported that the provincial government will use Rutherford's noique movie to aid in the teaching of geography in schools of the province.

Northern Development

Edmonton Board Of Trade Taking An Interest In This Important Work

Voicing his support of a Northern Alberta development council, John Blue, secretary of the Edmonton Board of Trade, stated recently that, "Every citizen of Edmonton and Northern Alberta is naturally in favor of developing the lands and mineral resources of our great northland.

"The north is worthy of all our best efforts, and in the formation of the proposed council the details should be carefully worked out. At the same time the general idea is good and it should appeal to Edmonton as well as to the northern towns and settlers in that country."

Deferred Payment

The road was slippery and the motorist's brakes refused to hold the car. He skidded wildly across the pavement and knocked a man off his feet.

Fortunately, the man was not badly hurt, and the motorist, diving into his pockets, produced five shillings.

"Here you are," he said. "Give me your address and I'll send you some more."

The man looked up with an injured air. "Look here, guv'nor," he said bitterly, "you don't think you can run me over on the instalment plan, do you?"

Scheme Did Not Work

Annie Elizabeth had a lover who had been courting her for 15 years, to the irritation of her father, who thought "it wer' time things were moving."

At his instigation the girl put a shy question. "Don't you think, dad, it's time you and me, were thinking about getting wed?"

"Aye," agreed her swain, heartily, "but who'd have us?"

Just Maude

"Name this child," said the minister, preparing to baptize the twins.

The proud father threw out his chest. "George Theodore Andrew John Lincoln Carnegie Jones!"

The minister gasped.

"And the other?"

The meek, nervous mother in a scarcely audible voice answered: "Maude."

A man's cup of joy resembles an after-dinner coffee cup, but his cup of sorrow holds several gallons.

ONLY WOMAN PASSENGER

Lady Grace Drummond Hay, English society woman and writer, who was the only woman passenger aboard the giant dirigible, "Graf Zeppelin," when it started on its trans-Atlantic voyage from Friedrichshafen, Germany, to Lakehurst, New York. With the other passengers she was insured for $48,000 in case of accident.

Wintering Surplus Queens

Method Used To Bring Surplus Queens Through Winter Without Loss

When the beekeeper finds that he has a surplus of queens in the fall of the year, the question arises as to how he may winter these without loss. At the Experimental Station, at Fredericton, New Brunswick, the following method for saving extra queens was tried. Four weak colonies were selected for the experiment. Five of the lightest combs were removed from each colony and the bees shaken back into the hive. The remaining five combs were placed to one side of the hive. The following day a tight division board was placed in two of the colonies and the bees and brood, and queens from the two remaining colonies were placed one in each of the divided hives. Two weak colonies with queens were thus brought together in one hive. Separate entrances were provided at the corners of the hives and an oilcloth was tacked to the division board beneath the cover and over the frames. These colonies were wintered in the cellar. Both queens came through the winter in good condition in one hive, but in the other only one of the queens survived.

Giant Herd Of Caribou

Immense Herds Of Canadian Northland Are Moving South

The caribou herds of the great Canadian northland are moving south and for the first time in many years a giant herd of these magnificent animals is approaching Hudson's Bay Junction, the most southerly point which they have reached for over 20 years.

It is good news for the hundreds of big game hunters from both eastern Canada and the United States, who are anxiously awaiting November 15, for the famous Canadian shooting season to open. Not only will caribou be good stalking in the vicinity of Hudson's Bay Junction this year, but moose and deer are also exceptionally plentiful, according to information received by the Saskatchewan Provincial Department of Wild Game.

This is a closed season for elk, although they were reported in great numbers north of Prince Albert, Sask., last year. Hundreds of these pretty animals are expected to flock to Saskatchewan's new national park, where they will find protection from the guns of big game hunters the year round.

Boots and Men

Boots have soles; so have men.

Boots sometimes get tight; so do men.

Poor boots are run over; so are men.

Boots will shine if polished; so will a man.

Some boots are imitation calf; so are some men.

Boots are tanned; so are men—in their youth.

Some boots can't stand much; neither can some men.

A boot to be of much account must have a mate; so must a man.

A boot when well heeled always feels comfortable; so does a man.

Why Should He

A landlord wrote to his tenant: "Dear Sir,—I regret to inform you that my rent is much overdue. Will you kindly forward me a cheque?" Back came the reply:—"Dear Sir,—I see no reason on earth why I should pay your rent. I can't pay my own.

Sees Regular Dirigible Service

Commander Eckener Of Graf Zeppelin Visualizes the Future

A regular dirigible service between Europe and the United States within four years, with sailings from both sides of the Atlantic every four or five days, was visualized by Dr. Hugo Eckener, commander of the Graf Zeppelin.

At least four giant airships will be necessary before the service can be inaugurated, Dr. Eckener explained. The ships will be larger and more powerful than the Graf Zeppelin. It will also be necessary to build two great hangars, one in the United States, and one in Europe.

Dr. Eckener favors the vicinity of Washington or Baltimore for the occasion of the American terminal in preference to Lakehurst due to unfavorable cross winds which are frequent over New Jersey. The European terminal, he said, probably will be located on the Rhine Valley near Basle, as Friedrichshafen, from where the Graf Zeppelin started its trans-Atlantic flight, is too high.

A capital of at least $10,000,000 will be necessary for the construction of the four dirigibles and the two hangars. Dr. Eckener estimated the cost of each airship will be about $1,500,000, if built in Germany. If some of the ships are built in the United States, the cost would be higher, due to higher labor charges.

Gains Made By Calves

Weighing Calves At Three-months Intervals To Record Increase In Weight

Few cattle raisers take the trouble to weigh their calves from month to month to ascertain the gains they are making. The Experimental Station at Sidney, B.C., have weighed calves at three-month intervals during a period of two years. The calves were of dairy breeding and eight of them were weighed until they were six months old, six of them until nine months, five until a year old, and two until twenty-four months of age had been reached. The calves at birth averaged 55.5 pounds. Their average gain for the first three months was 145.7; for the second three month 142.1; for the third 111.6; for the fourth 90.6 pounds; for the fifth 61.2; for the seventh 75 pounds; for the eighth 50 pounds; and for the ninth three-month period 20 pounds. These gains agree with the theory that the older an animal becomes the less rapid and the more expensive are the gains. The gains were not entirely uniform for the different animals, but the conclusion is reached by the superintendent of the station and reported in the report of the station for 1927, published by the Department of Agriculture, at Ottawa, that heifers mature normally and rapidly during the first year, that the increase during the next six months is comparatively slow, after which the increase slides up as during the first year.

Ready To Sign Up

An officer inspecting sentries guarding the line during Territorial manoeuvres came across a raw-looking infantryman.

"What are you here for?" he asked.

"To report anything unusual, sir."

"What would you call unusual?"

"I dunno exactly, sir."

"What would you do if you saw five battleships steaming across the field?"

"Sign the pledge, sir."

Made Safer For Birds

Saskatchewan is made safer for insectivorous and other useful birds by the sudden depletion in the crow population this summer by something approaching 250,000 as a result of the provincial crow competition. More than 4,000 individuals entered the contest, in which $2,500 was offered in 1,500 cash prizes, ranging from $100 to one dollar.

"I can't think how you can make such lovely statues."

"Quite simple. I take a piece of marble and chip away all I don't want."—Moustique, Charleroi.

PROMOTED

MR. ALBERT WILCOX

who was recently promoted to the position of assistant to the general manager, western region, Canadian National Railways. Mr. Wilcox, who was general superintendent of transportation, is well known throughout the west.

The Impulse Of Habit

Business Bred In the Bone Seldom Loses Its Attraction

A short time ago a horse fell into the docks at New York. It was old and blind, and not only could not see where to clamber out, but evaded capture.

For years it had ambled along hauling an ice wagon. But the driver recalled that in its heyday Dobbin had been in the New York city fire department. Believing that the firemen retained an affection for an old veteran, the iceman telephoned to the station to which it formerly belonged and told them of its predicament.

In a few minutes the engine came clattering along. The astute firemen halted near a spot where it would be possible for the horse to reach dry land and, setting the fire-bell a-clatter with all the power they could, they had the joy of seeing the animal set back its ears, and make with all haste for the direction from whence the sound came.

A few moments later the horse was safely ashore, taken to his stable and wrapped in warm blankets.

We humans are pretty much like that old horse.

We may retire from business, or we may quit and go into another line, but the call of the blood asserts itself until the end.

The farmer who goes to live in the city is never so happy as when puttering about in his garden, raising a few vegetables; the man who has run a certain machine for years renews his youth when he hears it hum and he itches to fiddle about with it again; the retired newspaperman who has printer's ink instead of blood in his veins, pricks up his ears at the old familiar sound of the press.

The impulse of habit is sometimes stronger than the weakness of the flesh.

Axioms Repeat Themselves

Expressed In Different Ways Among Practically All Peoples

Certain axioms expressed in different ways are to be found among practically all peoples and tongues. Take for instance "Taking coals to Newcastle," referring to the folly of sending that product to the point at which it is mined. Horace said: "It would be silly to carry sticks into the forest." The Greeks had a proverb about "carrying owls to Athens," the city abounding in those birds. Australians of today may like to amend it to "carrying rabbits to Australia." Another Grecian proverb complained of people "carrying fish to the Hellespont." And one could easily invent many more—such as carrying wheat to the prairies, carrying rock to British Columbia, or carrying yarns to the Bay of Fundy.

Our Trade With South Africa

Passing through Canada, by stages, en route to Peru, G. R. Stevens, Canadian Trade Commissioner in South Africa, said that Canadian trade with South Africa is steadily extending and that at present some 400 Canadian firms are exporting to that part of the world.

Interviewer (to big business man,): "I have called to learn the secret of your unparalleled success."

Big Business Man: "Just one moment, please. Are you from the American Magazine or the district attorney's office?"

Irate Customer—I can't eat this hash!

Waitress—Don't brag. You aren't the first one!

American collectors have during the last ten years, taken British antiques valued at a total of over $250,000,000 out of that country.

Investigation In Arctic Completed

Danish Explorers Will Submit Report On Reindeer Possibilities

Covering 14,000 miles of Arctic trails with dogs, canoes and horses during the two years that they were blazing a trail across the barren lands, the brothers A. E. and R. T. Porsild arrived from Waterways, thus completing the two-year-long investigation which they have been undertaking for the federal government into the chances of establishing a reindeer industry in the Northland.

It is another triumph for the viking breed that gave Stefansson and Amundsen to the world, for the two young men are Danes. They were educated at Copenhagen University and their father is now in charge of the Danish Arctic station—a scientific observatory at Godhaven, Greenland.

With them, the young explorers brought out 1,000 photos, 15,000 botanical specimens and many geological specimens. Porsild declined, however, to give for publication the conclusions reached by them as to the possibility of establishing reindeer ranching.

The Dominion Government will be the first to see their report. It is significant, however, that Porsild commented on the herds of the Lomen Brothers in Northwest Alaska, where Porsild Brothers saw a round-up of 100,000 of the animals with their Lapplander cow punchers mounted on riding reindeer.

Shipment Of Australian Oranges

A despatch to the Mail and Empire from Vancouver, says: "Marking a new departure in inter-Empire trade, the first consignment of Valencia oranges to reach this country from Western Australia passed through the port of Vancouver. A full carload of the fruit was shipped to Winnipeg. The Australian product will compete with oranges from California and will probably form the first of a continuous flow of this fruit from the antipodes to Canada.

Professor Offers Proof

Produces Calculations To Prove Earth Is Rotating Faster Than Regular Speed

Calculations showing that the earth is continuing to rotate faster than its regular speed of 24 hours per day were presented to the American Association of Variable Star Observers in annual convention at Cambridge, Mass.

The interest to many people in the calculations lies in their possible application to the study of earthquakes, rather than to any appreciable change in the length of the day. The cause of the faster speed is suspected to be the contracting of the earth's crust.

The calculations were presented by Ernest W. Brown Sterling, professor of mathematics at Yale University.

New York Buys B.C. Apples

Of the British Columbia apple crop harvested in the Okanagan Valley it is expected that 150 carloads will go direct to New York, although the principal market will be in the Prairie Provinces of Canada. An estimate of the crop is given at 1,259,000 boxes from the Okanagan and Kootenay districts. The apples are of fair quality, and the yield is the best in years.

Had Every Right

A woman pushed her way rudely through the crowd, gazing with admiration at the bearded lady at the country fair.

"Here, I say," said a man. "Be careful. What right have you to go running your way to the front?"

"Every right," was the haughty reply, "I'm his wife."

Mrs. White: Have you ever been in a predicament, Mrs. Green?

Mrs. G.: Why—er—I don't think I have, Mrs. White. Is it a roadster or limousine?

AT THE RACES.

"Why do they put numbers on the backs of the runners. They never arrive in the right order."—Journal, Amusant, Paris.

Acid Stomach

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer, when you learn how quickly, how pleasantly this premier method acts. Please let it show you—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

CHAPTER IV.—Continued.

"Pretty near got 'im that time, Donnie!" cried Andy gleefully. "If you can get 'im to lift 'is jaw off 'is shoulder, send in your right." Andy's hands were shaking with excitement, while Donald was cool and collected.

"Let me go after him, Andy," he begged; "I can whip him at his own game."

"No, no!" admonished Andy, "keep on as you are. Don't try to swap punches with 'im!"

Garrieau's seconds were working over him feverishly. Pursell leaned over the heavily-breathing champion, his evil face sick with apprehension.

"What'd I tell yer?" he exclaimed. "They've stuck a ringer in on us; dat feller ain't no amachoor! If he beats ya we're both bums! Foul him dis round, for de——" he finished with a savage oath.

At the beginning of the third round Garrieau charged his elusive adversary like a mad bull. Donald easily side-stepped him and he plunged into the ropes. As he rebounded, Donald landed a left and danced safely away without reprisal.

"You can do pretty footwork," snarled the champion with a look of Simian ferocity, "but I'll get you, you——" There followed a burst of wild cursing. He tried to rush Donald to the ropes, feinted for the wind, and let loose a powerful right for the jaw. Paying no attention to the feint, Donald ducked the blow and, countering, shot his left to his opponent's mid-section. The champion grunted aloud, fell into clinch, and hung on grimly. The referee pried them apart. Again the crowd came to their feet to shout in a frenzy of excitement.

Garrieau fell into a clinch, then wrestled about until he placed his opponent between himself and the referee. He loosed his right in a terrific upper-cut that missed, but his left smashed with fearful force to Donald's groin the most brutal foul that can be delivered. The referee did not see the blow.

Donald's nerves quivered with agony. A wave of torment and the awful nausea that follows such a blow swept thrugh him. His face writhing with anguish, his gloved hand clutching his groin, he crashed forward on his face. His body twitched for a moment, then lay still.

The crowd came to their feet and many moved toward the exits. Another victim, they thought, to the champion's terrible punch. A number at the ringside, who had witnessed the foul blow, stood upon their seats and screamed denunciations at the referee.

The referee stood with one hand on Garrieau's massive chest. The latter was lustfully straining forward while the fatal seconds were tolled off.

The roar of the crowd came to Donald's ears like the dash of waves on a distant shore. At the count of five his body quivered. At the count of eight, his jaw sagging, his face distorted, he struggled to his knees. He saw Andy's agonised face as through a fog and heard his desperate cry of appeal.

"Up, Donnie! Up!"

At the count of nine Donald's benumbed muscles answered the call of his brain. With tremendous effort he staggered to his feet and wound his arms about his faeee. The crowd yelled themselves hoarse in tribute to his courage.

Garrieau was upon him with a growl like a wild beast. Donald stood in the centre of the ring reeling drunkenly. Garrieau shot a terrific right for Donald's wind that struck his weakly protecting elbows. The impact carried him to the ropes, and he fell forward to his knees. Again the referee's arm rose and fell as he counted the seconds. Again Donald tottered to his feet to meet a fusillade of short-arm jolts that pierced his guard and sent him staggering.

The gong rang. With body swaying unsteadily and legs wavering, Donald walked to his corner and sank down heavily. What a blessed relief to lie and relax! His head felt leaden and there was a ringing in his ears.

His seconds worked over him in furious haste. Andy knew all the tricks of resuscitation: the upward sweep of hand on the mid-riff that brings the big nerve centre to life; the quick raising of the chest that brings air to the remote corners of the lungs. With a sudden choking in his throat, the little Australian realized that this boy was very dear to him. A prayer on his lips, his hands trembling, but sure and deft, he strove to restore the shattered nerves.

The colour came slowly to Donald's cheeks and the haze cleared away as the cold water was showered upon him. He felt his strength returning. A long deep breath and he was himself again. He looked across the ring at Garrieau, whose vulture-like manager was leaning over him with an exultant look on his face. This brute had deliberately fouled him. A cold and terrible rage swept through every fibre of Donald's being. He had demeaned himself by entering the prize ring. This was bad enough; but to lose the battle!—Never! He looked for his friends. Their faces, he saw, were tense and full of misery.

"Andy, I'm going after him," he declared in a hard voice.

Andy was about to remonstrate, but he caught a flash of the hard light in Donald's eyes, and the words died on his lips. He hesitated. Maybe he should have let Donald take the aggressive from the start.

"Are you strong enough, Donnie?"

Donald's eyes held a dull glow. "Yes!" he gritted.

Andy patted his arm as the gong rang. "Give 'im 'ell, Donnie!" And then added reverently: "May God giv 'im strength."

Donald shot from his corner as though thrown from a catapult to meet Garrieau before he was fairly out of his chair. The spectators held their breath. Was this the man who a minute before had walked staggering and beaten to his chair? When the referee pried the fighters apart after a fierce mix-up in the champion's corner, a puffed eye and a bloody face showed that Garrieau had absorbed severe punishment. Donald was everywhere, dancing in for a fierce rally and out again, always without a return.

The arena fairly rocked to the cheers of the crowd as Donald stood in the centre of the ring and exchanged punches with the champion. Head to head they stood while Donald's arms worked with such lightning speed that the champion's blows were smothered. And, marvel or marvels, the champion was giving ground. The pursued had become pursuer. The tide had turned. With his arms wound about his face the champion retreated. As he essayed a lead, Donald's fist smote his face before he could again cover up. Following relentlessly, Donald penetrated his opponent's guard with rights and lefts until the champion's face was a smear of red.

A bedlam of sound came from the audience as they stood on their seats and roared their admiration for the challenger's wonderful exhibition. Andy, his face set, his eyes bulging clung to the corner of the ring.

Garrieau drove heavily at his elusive foe and missed. The impetus swung him to one side. For an instant his chin was without the protecting shelter of his shoulder. With a bewilderingly swift move Donald stepped forward, pivoted on his toes, and with the full weight of his powerful young body behind it, he whipped his right to the champion's unprotected jaw. Plop! Garrieau fell upon his face and sprawled like a baboon on the floor. Donald walked to his corner, thrust his gloved hands towards Andy, who stood as though paralyzed, and said; "Take them off, Andy." His voice was audible throughout the arena. The referee rushed to Donald's side and raised his arm aloft in token of victory.

With a roar the crowd came to its senses to realize that the fight was over. Pandemonium broke loose. A struggling mass of humanity surged into the ring. Every man wanted to shake hands with the new champion. Garrieau, the possessor of the "punch" they had so much admired, was forgotten. The king is dead — long live the king! Such is life, especially in the boxing game!

CHAPTER V.

With much difficulty Donald and his friends forced their way through the cheering throng to the dressing-room. Weak and tired, Donald lay on a cot, while his handlers gently massaged his sore body. Andy moved to the cot and stood looking down on his protege.

Donald opened his eyes. "Hello, Andy," he smiled weakly.

"Hello, Donald," said Andy huskily, as he patted Donald's dark head.

Donald's hand stole out to meet the warm clasp of his friend.

"Some little fight," said Andy, summoning a smile.

"Not bad," agreed Donald.

Gillis pulled his hat brim down over his eyes to hide his emotion. "I've a good mind to go out and give that brute another licking," he growled.

One of the promoters thrust his head through the door. "Come and get your dough!" he shouted.

"Strike me lucky!" returned Andy, "those words 'ave a pleasant sound."

Badminton players find a drink of hot tea of great benefit after a strenuous game. In leading Badminton clubs of Canada, Red Rose Tea is a great favorite. No other tea offers such brisk, zestful flavor and rich quality. Put up only in bright, clean aluminum packages. 14EW

He picked up a small handbag and left the room. In a few moments he returned, his face beaming. He tapped the satchel. "Chuck full," he said happily.

At the gymnasium they gathered in Andy's room, and for the first time Donald told them of the attempted "frame-up" proposed by Garrieau's manager. Douglas strode across the room and gripped Donald's hand. Not a word was uttered by anyone, but the silence was more eloquent than speech.

They were all in a happy mood after the prolonged strain of the day. Andy was in particularly high spirits. "Gentlemen," he began grandiloquently, "I 'ave before me on the tyble 'ere a most wonderful little 'andbag. All it 'ad in it this morning was a dirty collar and a shirt stud. Now," making a dramatic gesture, "it's the bloomin' 'orn of plenty!" He turned the satchel upside down and a mass of bills, coins and cheques fell upon the table.

"'Ere, Gillis," cried Andy, as he selected a bill, "will you go out and get some champagne, and when you goes in the bar buy a drink for the 'ouse. Bring ginger ale for Donnie; 'is manager'll drink 'is share of the wine."

Andy sorted the money into piles and sat quietly counting for a few minutes. "Fifteen thousand and a few odd dollars," he announced.

"What!" ejaculated Donald. He was astounded. He had given the size of the purse little thought. "I had no idea it would be so much," he said in a surprised tone.

"Oh, the boxin' gyme is a great gyme," said Andy.

"Yes," remarked Douglas, "but after seeing that bout today I'm going to take up tiddlywinks instead; it's not so rough."

When the big man returned with the wine Donald turned to Douglas. "It seems that you and Gillis are old friends."

"Why, yes. Jack's been one of Dad's right-hand men for—how long, Jack?"

"About ten years," replied Gillis.

"And I'm equally interested to know how you and Jack know each other so well," said Douglas curiously.

"I met Donald on the train comin' out," answered Gillis quickly.

"Come on, boys," cried Andy, we'll drink to the new champ—to Donnie's health." Andy held his glass aloft. "Boys, I can't make much of a speech, as I 'ave only 'ad one drink. Stand up while we drink to our Donnie. I knows that 'e's goin' to leave me, and that 'e's goin' to give up the boxin' gyme. I knows that 'e isn't in the 'abit of mixin' with the likes o' me. I knows that I'm lucky to be blackin' the boots o' a man like 'im. But when I knows that 'e went into this fight to 'elp a poor little bloke like me out of an 'ole, I'm proud, boys, I'm proud! I've seen many a fight, and I've seen many a gyme man. But strike me blind if Donnie didn't this day teach me something about sheer grit. When 'e came stumblin' to me at the end of that—that third round—I——" He stopped. "You know what 'appened," he continued in a husky voice. "I ask nothin' better'n to 'ave 'im for me pal. 'Ere's to the gymest man that ever stepped in shoe-leather! 'Ere's to 'im!" Andy turned away quickly to light a cigarette. His eyes were moist. The room was silent.

Donald was deeply moved by his little friend's show of feeling. Douglas broke the silence. "You got back to the Coast just in time, Jack."

"How's that?"

"Dad has started on the biggest job that he's tackled yet.

"What is it?"

"Do you remember the big tract of timber that he bought in the Cheakamus Valley?"

"Yes," he bought on my advice," answered Gillis.

"Well, he's going to run a railroad in and build sawmills, and saw the logs right on the spot instead of shipping them to the Coast."

"Good!" said Gillis heartily. "There's a wonderful stand of timber in that valley."

"But here's the best part of it," Douglas went on eagerly: "Dad's going to send you in to cruise the timber around Summit Lake, and I'm to go with you. It's a wonderful country. I was up there last summer." He turned to Donald. "Will you go with us?"

"I'll be glad to," assented Donald.

"Good!" cried Douglas. "It will be fine camping with you and Jack."

Little Andy sat patiently listening to this lively conversation, in which he had been completely ignored. He could contain himself no longer.

"I s'y," he blurted, "am I such a blinkin' dwarf that you've forgotten that I'm in this 'ere crowd? Isn't me 'ead above the tyble? Where the 'ell do I get off on this 'ere bloomin' picnic, I asks you?"

One look into the Australian's seriously comic face with its heavy blond eyebrows wagging up and down set Douglas into paroxysms of laughter. "Andy," he declared, "I'm going to take you along, even if we have to mark you 'excess baggage.' Can you cook?"

(To Be Continued.)

A GREAT PUZZLE TO CAREFUL PARENTS

One of the greatest puzzles to the careful parent is to know just what medicine to give the little ones. When the child falls ill with griping pains; is seized with cold or fever, refuses food or vomits what he has taken, when he cries a great deal and cannot get the sleep so necessary to the growing child, the parent is in a quandry. What is to be done on such occasions? As often as not there is not a suitable medicine in the house. The puzzle is what to give him to set him right quickly.

It is to meet such emergencies that Baby's Own Tablets were designed. These pleasant little Tablets quickly reduce fever, break up colds, relieve constipation and indigestion and allay teething pains. They quiet the nerves and promote restful health-restoring sleep. They are guaranteed absolutely harmless and safe for even the youngest and most delicate baby.

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Scientist Makes a Strange Discovery

Convinced That Human Body Has Radio Tuning Point

C. R. England, a research scientist of the Bell Telephone laboratories, New York, says that after extensive experiments he was convinced of the soundness of his theory that the human body has a radio tuning point.

The tuning point of his body, he said, was 3.66 metres and was discovered accidentally while he was working on radio oscillators producing very short wave lengths, England explained.

Starting with five metres, he said he worked downward gradually and encountered difficulties when he went below four metres. A search for the cause disclosed that his body was working as a tuned circuit, he said.

Mothers can easily know when their children are troubled with worms, and they lose no time in applying a reliable remedy—Mother Graves' Worm Exterminator.

She: "I bobbed my hair to show my independence."

He: "What did you bob your skirt for?"

Better keep yourself clean and bright; you are the window through which you must see the world.

Little Helps For This Week

"See that none render evil for evil unto any man; but ever follow that which is good."—1 Thessalonians v. 15.

The fairest action of our human life
Is scorning to revenge an injury:
He who forgives without a further strife,
His adversary's heart to him doth tie;
And it is a firmer conquest, truly said,
To win the heart than overthrow the head.

— Lady Elizabeth Carew.

Hath any wronged thee? Be bravely revenged; slight it, and the work's begun; forgive it, it is finished; he is below himself that is not above an injury.—Quarles.

A more glorious victory cannot be gained over another than this, that when the injury began on his part, the kindness should begin on ours.

— Tillotson.

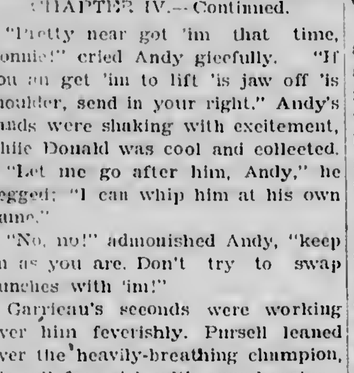
OVER 21 MILLION JARS USED YEARLY

What Will *you do*



When *your* Children Cry for It

There is hardly a household that hasn't heard of Castoria! At least five million homes are never without it. If there are children in your family, there's almost daily need of its comfort. And any night may find you very thankful there's a bottle in the house. Just a few drops, and that colic or constipation is relieved; or diarrhoea checked. A vegetable product; a baby remedy meant for young folks. Castoria is about the only thing you have ever heard doctors advise giving to infants. Stronger medicines are dangerous to a tiny baby, however harmless they may be to grown-ups. Good old Castoria! Remember the name, and remember to buy it. It may spare you a sleepless, anxious night. It is always ready, always safe to use; in emergencies, or for everyday ailments. Any hour of the day or night that Baby becomes fretful, or restless, Castoria was never more popular with mothers than it is today. Every druggist has it.

Fletcher's CASTORIA

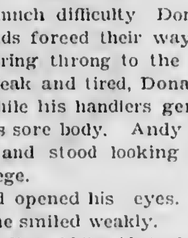
SUMMER COMPLAINT
Nearly Lost Her Little Girl

Mrs. Theodore Rivett, Anthony, Ont., writes:—"Last Fall I nearly lost my little girl as she was suffering terribly from summer complaint. She became very thin and weak; had no appetite, and could hardly walk across the room without falling down. At last my mother advised me to get a bottle of



and after she had taken a few doses she was relieved.

I also found it a grand remedy for cramps, and would not be without a bottle of it in the house for anything."

Has been on the market for over 80 years; put up only by The T. Milburn Co., Limited, Toronto, Ont.

at the Capitol next week-end

It Never Rains But-

Mr. H. S. Allen paid a flying visit to the Standard Bank last Friday. He had no intention of going the bank that morning, but his car willed otherwise. He made a turn in front of the bank preparatory to driving away when the motor of his car stalled. He climbed ont to crank it, accidently leaving the gear lever in the reverse position. When he turned the crank over the motor started and the car leaped backwards crashing thru the front of the bank breaking the large plate glass window and scattering bricks in all directions. Bank manager T. L. Halpin was sitting at his desk dictating a letter to his stenographer, Mrs. Linkous when the accident occured Fortunately no one was hurt, even the car escaped undamaged.

Messrs. Tom Wolsey and Seldon Collett, driving the latter's Ford Coupe, duplicated Mr. Allen's performance on the same day, using the big plate glass front of the Postoffice as a target. The office was crowded and excitement prevailed, but no one was injured.

On Thursday the Togo Cafe was badly damaged when Mr. Sanamura, driving a new Ford crashed into the north front window pinning a Japanese farmer against the sill injuring his knee. The impact broke the window and moved the line of show cases breaking the glass in one of them.

It has been suggested that an iron fence be placed along Broadway to prevent future accidents.

The Famous Jiu Jitsu Champion Professor Takahashi in Action at the Capitol Theatre at an Early Date

Professor Takakashi, who meets three local mat artists here next week at the Capitol Theatre is internationally famous as a Jiu Jitsu Champion wrestler. The professor has had a colorful career. He was student champion in jiu jitsu and wrestling in Japan. He came from Japan in 1915 and was an instructor during the World War. During the past three years he was employed to instruct the Vancouver police department. Besides his ability as a wrestler, he has a good boxing record and is aspiring for the welterweight championship of the world. He has fought 379 matches and lost but one fight on this side of the Pacific. Never in his career has he been defeated at jiu jitsu. He has met and defeated such men as Jack Milo, Frank Hall, Bull Montana, Jatrindel Goeber, Joe Nelson, Tommy Gans and many other notables of the squared circle.

Mr. Takahashi's opponents are all men familar with the wrestling game. Henry Anderson has held provincial honors in his class several times. Fred Smith has met men of high rank in the game in the United States.

Mrs. William Anderson of Raymond, who has been visiting in Cardston with her sister, Mrs. Arelia Anderson, returned home Wednesday morning.—Cardston News.

Miss Kate Allred will leave shortly for Salt Lake City, where she will spend the winter in college.

Mr. Ray Knight and two men who were riding with him miraculously escaped uninjured when their car skidded into the ditch and turned turtle at Mammoth coulee last Monday. The car received but very little damage.
